Dairy nears finishing expansion

By Vera Sloan Colby Free Press sl604@st-tel.net While most of the country is fighting to stay alive in a recession that has gripped the country for more than three years, the McCarty Dairy in Thomas County is near finishing a multimillion-dollar expansion which will make it a supplier of one of the nation's largest producers of

yogurt and dairy drinks. The dairy, southwest of Rexford, is building a plant slated construction crews are busy with to supply condensed milk to the expansion. the Dannon Yogurt plant in Fort Worth beginning April 1.

"Never in our wildest dreams did we ever imagine anything like this would happen," said Judy McCarty, who owns the expanding dairy operation together with her husband Tom and four sons, David, Mike, Clay and Ken.

Thomas County that lured the given a boost to the area's econfamily from a land-locked area omy with added business for resin Pennsylvania. The expansion happened. The family has been happy here, and after nearly 12 years, still expanding.

From the McCarty's beginnings in Kansas, the original herd of 750 cows near Rexford was soon expanded to include a facility near Bird City in Cheyenne County that houses an additional 2,200 head.

This past summer, the family leased a dairy north of Scott City. They began operations there with 500 head during the fourth week of November. And now there's more.

"It just sort of happened," said Judy, "The boys were talking to a consultant who works for sion, and it was the consultant's out 3 1/2 loads of condensed dream to put something like this product daily. And since milk is together because it had never 87 percent water, the dairy will been done before, and that's how it all started.

"Dannon is a huge corporation which produces yogurt and ground water than before. dairy drinks for shipment from

gurt hourly."

Dairying is more than just milking cows. There're newborn calves to tend to, heifers to be fed and prepared for breeding, manure to haul, feeding various rations to the various ages of animals, machinery and equipment to keep in working order, plus making sure it's all done by the clock. And there's never a day off when there are cows to be milked.

This all goes on daily while

McCarty said many area businesses and agencies, including Midwest Energy, Jim's Electric, the Thomas County commissioners, Foley Equipment, Colby Implement, Colby Canvas and the Northwest Kansas Planning and Development Commission, to name a few, have been good to work with. She said the fam-It was the wide open plains of ily workers on the project have taurants and service stations and renting 80 to 90 motel rooms.

The Rexford dairy, she said, will add from 13 to 17 jobs for the new project, with the first product to be approved to go out April 1.

To fulfill the dairy's commitment to the Fort Worth plant, she said, the family needs to be milking 7,500 cows, so each dairy

will have around 2,500 cows. The Bird City dairy completed a new free-stall barn this year. Crews now are enlarging the milking parlor and maternity area at the Rexford dairy.
