

# OBITUARIES

## Jack D. Sheley

Sept. 25, 1932 - Oct. 15, 2004

Jack Denzel Sheley, 72, died Oct. 15, at the Andbe Home in Norton.

Mr. Sheley, the son of Alva Ray and Mina Emeline (Ballinger) Sheley, was born September 25, 1932, in Norton.

He attended the Dry Creek rural grade school, and graduated from Norton Community High School.

On Feb. 10, 1954, he and Betty Ann Oldham were married in Chandler, Ariz. They made their home in Chandler until 1957, when they returned to Norton. He was a veteran and a self-employed businessman.

Mr. Sheley was member of the Norton Church of God, Norton Chamber of Commerce and Alcoholics Anonymous

He was preceded in death by his parents, and one son-in-law.

Survivors include: his wife, Betty, of Norton; three children, Nadine Fowler and friend, George Shewey, Norton; Joyce and Arther Johnson, Houston; Jack L. Sheley, Houston; one brother, David and Wanda Sheley, Norton; one sister, Donna Lee Olson, Aurora, Colo.; five grandchildren; and one great-grandchild.

Funeral services will be held at 2 p.m., Thursday at the First Church of God, Norton, with Pastor Terrill Worthington officiating. Inurnment will be in the Norton Cemetery.

A memorial has been established to the American Cancer Society, P.O. Box 102454, Atlanta, Ga. 30368-2454.

Arrangements are under the direction of Enfield Funeral Home, Norton.

## Jennings will host soup and dessert supper

A soup and dessert supper will be held from 6 to 8 p.m. on Saturday, Oct. 30, at the Jennings Community Building to raise money for a renovation project.

On the menu are chili, potato soup, cake, tea or coffee, all for a donation.

Cards will be played at the Jennings Senior Citizens Center after the supper. Everyone is welcome.

# Baked barley dish is sure to perk up your family

Tired of 'taters? If you're searching for something special for a potluck supper, holiday buffet or just something different to perk up a family meal, consider this barley dish.

It's an excellent substitute for potatoes and as an added advantage, much of it can be prepared ahead of time. Leftovers also re-heat very well but if everyone likes it as well as I do, you probably won't have any.

Baked barley goes well with almost any meat. The first time it was served to me it was combined with grilled pork tenderloin, buttered beets fresh from the garden, and a big spinach salad. Just pretty close to perfect in one gal's opinion.

• An apology to those would-be cookie bakers who have been searching for burnt sugar extract for the cookie recipe of several weeks ago. Thanks to those of

Cook's Corner  
**Liza Deines**

this product and apparently no one else does either. After searching the Internet for a source, it appears we'll have to make our own. Here's how . . .

### BURNT SUGAR EXTRACT

Place half cup of white sugar in a glass measuring cup in the microwave at 70 percent power for

12-15 minutes or until it turns deep golden brown. Remove carefully (HOT) and set to cool for just a few minutes, then add two tablespoons of boiling water and stir well. A teaspoon of this mixture will serve as burnt sugar extract. Store remainder in a glass jar in refrigerator.

**BOKAYS & BRICKBATS** Brickbats to Norton County's anonymous poison pen campaigner. Bokays to those who are too smart to be fooled by such cowardly tactics.

**CLARICE'S BAKED BARLEY**

1/2 cup diced onion  
one stick real butter (no substitute)  
1/2 cup barley  
Pinch of salt  
1 cup sliced mushrooms  
1/2 cup slivered almonds  
3/4 cup chicken broth (divided)

Saute the onion, barley and salt in half stick of butter, add half the chicken broth and pour into a greased casserole. Bake at 350° F for 30 minutes. Meanwhile, sauté the mushrooms in the remaining butter. Stir into the baked mixture along with the remaining broth and the slivered almonds. At this point the dish may be cooled, covered tightly and refrigerated overnight if convenient. To finish, bake another one and a half hours at 350° F. If it has been refrigerated, may need to add a bit more liquid and cook a bit longer. Should be moist and bubbly, not crispy. This amount serves 4-6 but I always double it.

## OBITUARY Paul W. Kintigh

Aug. 23, 1910 ~ Sept. 30, 2004

Paul W Kintigh, son of Elmer and Margaret (Kint) Kintigh was born on August 23, 1910 in Norton County, Kansas and passed away in Cypress, California on September 30, 2004 at the age of 94.

He grew up to manhood on the family farm northwest of Norton and attended Pleasant Hill Grade School and graduated from Norton County High School in 1929. He married Wilma M. Morse in Phillipsburg, Ks. On April 2, 1932. They lived on a farm northeast of Norton from 1937 to 1983, when they moved to Norton. He was a farmer and worked at the Norton State Hospital for 26 years. He and Wilma were married for 66 years before she passed away in 1998. He was an active member of the Norton United Methodist Church for many years.

He loved all children and animals; he was especially fond of his grandchildren and his great-grandchildren.

Survivors include one son and his wife, Jerry and Jeanette Kintigh of Potomac Falls, Va.; one daughter and her husband, Kay and Ken Peterson of Cypress, CA. and four grandchildren: Kevin and Jennifer Peterson and their children, Steven, Christopher, Allison and Kaitlin of California; Kent and Carolyn Peterson and their children, Justin, Chad and Zachary of California; Mark Peterson and his children, Aimee, Kenny and Kelsey of Utah; Christopher and Annette Peterson and Benjamin of Virginia; other relatives and friends.

He was preceded in death by his parents, six brothers, four sisters, his wife, two grandsons-Eric Kintigh and Todd Kintigh-and one great-grandson, Aaron Peterson.

Funeral services were conducted at the Enfield Funeral Home on October 8, 2004 with Reverend Lew VanDerWege of the Norton United Methodist Church officiating. Interment was at the Norton Cemetery.

## Farmers wondering when to replant wheat

Farmers are asking for more information on when they should replant their wheat, so here is a detailed summary of when to replant put together by Jim Shroyer, K-State wheat specialist.

According to Jim, there is no easy answer to the question of when to replant. Variables include whether a thin stand is uniform across the field, or there are bare areas; if we have a late fall that allows the surviving plants to tiller; if the field is subject to wind erosion; what seeding rate should be used if we decide to replant; if using a hoe drill, should the surviving plants be disregarded, or, if using a double-disc opener drill, should the seeding rate be reduced because more of the original plants will survive?

The decision to keep the stand or to replant will be on a field-to-field basis. The key point will be how close the average number of plants per foot of row present is to the number that should be there.

A farmer has to determine the number of plants per foot of row expected in a normal, undisturbed field. If you use a drill with 12-inch row spacing, and plants at a 60-pounds-per-acre seeding rate with a wheat variety having 15,000 seeds per pound, and expect a germination and emergence rate of 75 to 80 percent, there should be 675,000 to 720,000 plants per acre or about 15.5 to 16.5 plants per

agronomist

foot in each row.

Next, you need to determine the average number of plants per foot of row present by taking plant counts across the field. Generally, if there is 50 percent of an expected stand, or eight or more plants per foot of row (12-inch row spacing), which is uniform across the field, the recommendation is to keep the stand.

With plant stands less than 40 percent of an expected stand or less than six plants per foot, the recommendation would be to replant. However, when there are six to eight plants per foot, the decision is tough.

Research indicates that 260,000 to 320,000 plants per acre, or about six to seven plants per foot, can produce respectable yields, especially if the plants are able to tiller well, though a 5 to 10 percent yield reduction can be expected. With six to eight plants per foot, a double-disc opener drill and 40 pounds per acre seeding rate could be used to thicken the stand.

However, if there are six to eight plants per foot and a hoe drill is

used, the seeding rate should be slightly higher than what was originally planted because the hoe drill will destroy much of the original stand. The date for the replanting becomes an issue, because later in the planting season, the seeding rate needs to be increased to compensate for the lack of tillering. Also, planting at a 45-degree angle across the original stand may reduce the number of plants destroyed.

If there are six to eight plants per foot and the decision is made to leave the stand, farmers should watch for wind erosion problems because there aren't enough plants to provide soil cover. Also, there could be greater weed pressure next spring.

If no plants have emerged yet in some areas, dig through the soil crust to determine if the seeds or seedlings are viable, or if the coleoptiles or sprouts have pushed up to the crust and become bent or crinkled.

Sometimes a light rain will soften the crust so seedlings can continue to emerge. Otherwise, a rotary hoe can be used to break up the crust. A rotary hoe cannot be used effectively if the wheat was no-till planted or there is a lot of crop residue. These bare areas will need to be replanted as soon as possible with slightly higher seeding rates to compensate for the lack of tillering and to be competitive with weeds.

## Teams forming for Pet Society Trivia Contest

Teams are still forming for the annual Trivia Contest on Saturday at the Norton Eagles to benefit the Second Chance Homeless Pet Society. Team registration will begin at 6 p.m. and the competition is from 7-10 p.m.

There will only be 20 teams allowed with a maximum of ten members per team. The cost is \$5 per team member and they must be at least 18 years old.

To reserve a table call Betty

Terrell at 877-2157 or Linda Terrell at 877-5219.

Throughout the evening there will be drawings for prizes, free popcorn and a food stand.

KQNK radio station is co-sponsoring this event and the ten rounds of questions will be delivered by on-air personality Marvin Matchett.

The decision of the judges will be final and a tie will be broken by "Rock, Paper, Scissors".

## LAND AUCTION

Tuesday, October 26, 2004 • 10 a.m.  
Location: Court room in Court House Oberlin, Kansas

**SELLERS: RUTH ANTHONY HEIRS**

**LEGAL DESCRIPTION**  
TRACT 1: Northwest Quarter (NW 1/4), Section Twenty-two (22), Township Three (3) South, Range Twenty-five (25), Norton County, Kansas

TRACT 2: Southeast Quarter (SE 1/4), Section Sixteen (16), Township One (1) South, Range Twenty-six (26), Decatur County, Kansas

TRACT 3: Northeast Quarter (NE 1/4), Section Thirty-two (32), Township One (1) South, Range Twenty-six (26), Decatur County, Kansas

**TERMS:** 10% down day of sale, balance at closing on or before November 23, 2004 with certified funds.

**MINERALS:** Sellers are reserving an undivided one-half interest in oil, gas and other minerals for a term of 10 years from date of sale, and as long thereafter as oil and/or gas may be produced. Sellers shall be non-participating in bonuses and delay rentals, but fully participating in royalties.

**TAXES:** Sellers shall pay all of 2004 and prior years taxes

**2003 TAXES:**  
Tract 1 - \$468.28  
Tract 2 - \$469.90  
Tract 3 - \$248.14
