DREADED DISEASES

HOW CAN GOD WORK THROUGH THEM?

Cancer, heart disease and other dreaded illnesses have claimed countless lives and struck fear in the hearts of many family members. Our small rural communities in Norton County seem to have been struck by these deadly killers all too often bringing heartache, dismay and depression into many a household. The homes of Christians and non-Christians alike have been afflicted at some time with life-threatening illnesses.

The Bible gives various reasons why sickness is allowed to come upon man and beast but mostly He allows it out of love—that is, He uses our illnesses to draw all thoughts of the human mind and heart to Himself.

It is not the time to do an in-depth exposition on sickness and illness from a Biblical perspective. However, we would like for you to prayerfully consider joining us to hear the testimony of one person who has seen and experienced God's sustaining grace in his and his wife's lives as they faced the rigorous testing of their new-found faith, the need of physical healing, and how they came to understand more deeply the Lord's unfailing love in the greatest trial of their lives.

Come and Hear

Michael E. Kelly

At

Community Full Gospel Church

313 W. Lincoln St.

10:30a.m.-12:00 Noon

On

Sunday, February 13, 2005

Michael E. Kelly is the City Attorney for Kearney, Nebraska. He will be in Norton to share a testimony of his conversion, the healing of his wife Jo of cancer in 1985, the following eighteen years of life together in the Lord's grace, and then about Jo's passing on to be with Jesus in September of 2003.

Join us February 13th if you have cancer, heart disease, some other life-threatening illness or just desire to be touched, challenged, encouraged and given the opportunity to find a peace with the Lord that passes all understanding. You can choose to walk through the most fearful times in your life with an uncompromising trust in a God who loves you and longs to bring you close to His side. Whether you have a serious illness yourself or have a family member or close friend who faces possible death due to a dreaded illness, you will find real hope through Michael's testimony of God's grace that is promised to all who will surrender to the Lordship of Christ.

Jesus said, "Peace I leave with you; My peace I give you, I do not give to you as the world gives. Do not let your hearts be troubled and do not be afraid." (John 14:27) "[Let] your soul find rest in God alone..." (Psalm 62:1)

Make plans to be with us and give the Lord an opportunity to minister to you through this life-changing testimony.

PROFILE #1

"Health Profile & CBC" — \$40.00

Health Profile Contains:

ELECTROLYTES: (Sodium, potassium, chloride and total carbon dioxide). These are major indicators of kidney and hormonal functions. Electrolytes are essential for the body's acid-base balance and the operation of nerves and muscles, especially the heart.

KIDNEY FUNCTIONS: (BUN, creatinine). These indicators are used to monitor kidney function.

LIVER FUNCTIONS: (Total albumin, globulin). These tests can be used in detecting and/or monitoring liver function damage, tissue damage or inflammation.

ALKALINE PHOSPHATE: (Uric acid, calcium, phosphorus). Used for detection and monitoring of bone, tissue and parathyroid disease, such as arthritis, gout, bursitis and lupus.

GLUCOSE: This test is to measure blood sugar levels and is used to help diagnose/monitor diabetes mellitus.

CHOLESTEROL: (Including HDL, LDL, VLDL, triglycerides and ratio of LDL/HDL). These are fats produced in the liver that combine with fatty oils in the blood stream. Cholesterol is further broken down and measured as HDL (good cholesterol) and LDL (bad cholesterol). The person who has higher levels of LDL is at greater risk of heart disease. Triglycerides determine the level of simple fats in the blood. CBC: (Complete blood count with differential). This is a series of tests of the blood that provides a tremendous amount of information about the hematologic system, immune response and many other organ systems.

PROFILE #2 (PSA)—\$20.00

PSA—This test detects an enlarged prostate, infected prostate and/or prostatic cancer. It can be used to evaluate disease progression and to monitor treatment.

PROFILE #3 (TSH)—\$15.00

TSH—This test is used to evaluate thyroid function and detect if there is too much or too little hormone secreted by the thyroid.
