Kathy, 785-877-5651

**Suffering silently doesn't
make you more of a man.**

Men are taught to ignore their feelings. Maybe that's
why men are four times more likely to commit
suicide than women. Emotions don't make
you less of a man. Neither does asking for
help. We are here for you, too.

You wouldn't ignore chest pains. You
shouldn't ignore your feelings either.
Please let us help.

TIME: 7:00 a.m.-12 noon**

**PROVIDED BY A JOINT EFFORT OF THE NORTON COUNTY
HEALTH DEPARTMENT AND THE NORTON COUNTY HOSPITAL**

Need to be Fasting Before the Test (No Food or Drink After Midnight)

**QUESTIONS? Call Norton County
Health Department at 785-877-5745**

**PROFILE #1
"Health Profile & CBC" — \$40.00**
Health Profile Contains:

ELECTROLYTES: (Sodium, potassium, chloride
and total carbon dioxide). These are major indi-
cators of kidney and hormonal functions. Elec-
trolytes are essential for the body's acid-base
balance and the operation of nerves and muscles,
especially the heart.

KIDNEY FUNCTIONS: (BUN, creatinine). These
indicators are used to monitor kidney function.
LIVER FUNCTIONS: (Total albumin, globulin).
These tests can be used in detecting and/or moni-
toring liver function damage, tissue damage or
inflammation.

ALKALINE PHOSPHATE: (Uric acid, calcium, phos-
phorus). Used for detection and monitoring of
bone, tissue and parathyroid disease, such as
arthritis, gout, bursitis and lupus.

GLUCOSE: This test is to measure blood sugar
levels and is used to help diagnose/monitor dia-
betes mellitus.

CHOLESTEROL: (Including HDL, LDL, VLDL, triglyc-
erides and ratio of LDL/HDL). These are fats pro-
duced in the liver that combine with fatty oils in the
blood stream. Cholesterol is further broken down
and measured as HDL (good cholesterol) and LDL
(bad cholesterol). The person who has higher levels
of LDL is at greater risk of heart disease. Triglycer-
ides determine the level of simple fats in the blood.
CBC: (Complete blood count with differential). This
is a series of tests of the blood that provides a tre-
mendous amount of information about the hemato-
logic system, immune response and many other or-
gan systems.

PROFILE #2 (PSA)—\$20.00

PSA—This test detects an enlarged prostate, in-
fected prostate and/or prostatic cancer. It can be
used to evaluate disease progression and to moni-
tor treatment.

PROFILE #3 (TSH)—\$15.00

TSH—This test is used to evaluate thyroid function
and detect if there is too much or too little hormone
secreted by the thyroid.
