**PRAIRIE LAND ELECTRIC COOPERATIVE, INC. (PRAIRIE LAND), REQUESTS PUBLIC COMMENT ON ITS PROPOSED RHOADES TO PHILLIPSBURG 115-KV TRANSMISSION LINE BUILDING PROJECT**

Published in The Norton Telegram on Friday, April 10, 17, 24, 2009.

### LEGAL NOTICE

Prairie Land Electric Cooperative, Inc. (Prairie Land), requests public comment on its proposed Rhoades to Phillipsburg 115-kV Transmission Line Building Project. Prairie Land has prepared an ENVIRONMENTAL REPORT (ER) for evaluation by the UNITED STATES, DEPARTMENT OF AGRICULTURE, and RURAL UTILITY SERVICES (RUS). This ER may be reviewed at the office of Prairie Land, located at 14935 US Hwy 36; Norton, Kansas. RUS will either prepare its own independent Environmental Assessment or adopt the ER prior to its decision to grant financial assistance for the proposed facilities. Prairie Land has determined that this project is necessary for reliable service and to meet the requirements of the Regional Transmission Organization (RTO), Southwest Power Pool (SPP). This project also provides for additional system load growth for Prairie Land. The proposed Rhoades to Phillipsburg 115-kV transmission line is approximately 30.6 miles in length and will generally require a 100 foot wide right-of-way. The proposed line will run along section lines from the Rhoades substation (located in Section 10, Township 3S, Range 23W, Norton County, Kansas) to the Phillipsburg substation (located in the middle quarter of Section 23, Township 3S, Range 18W, Phillips County, Kansas). There will be approximately six to eight single pole (Braced Post Insulator) structures per mile. The transmission line conductor will consist of three conductors and one static wire. Conductors are 795,000 KCM Aluminum Conductor Steel Reinforced (ACSR) type with a conductor outside diameter of 1.108 inches. The static wire is Extra High Strength (EHS) steel with a wire outside diameter of 3/8 inch. Most of the ground the line will cross is pasture or cultivated farm ground in Norton and Phillips counties and is privately owned. Modifications to the existing Rhoades and Phillipsburg substations will be required for the addition of this transmission line. The modifications of both substations will include additional circuit breakers, switching devices, aluminum bus work and steel supporting structures. These additions will require approximately 1.0 acres of new substation area and will include earth work to level and compact soil to match the existing substation grade. Interested parties are invited to comment in writing within 30 days of this notice to:

Prairie Land Electric Cooperative, Inc.  
**Alan Miller General Manager and CEO**  
 14935 U.S Hwy 36  
 PO Box 360  
 Norton, KS 67654

A copy of all comments will be sent to RUS for its review.
