Steps could save credit

By ERICA BRADLEY
ebradley@nwkansas.com
 Identity theft affects millions of Americans every year; last year it cost Americans \$1.5 billion. Norton County Undersheriff Rich Wenzl attended a class Aug. 4 in Salina regarding the steps that need to be taken after someone suspects their identity has been stolen.

He said step one is to place a fraud alert on your credit report by contacting one of the credit reporting companies.

One company will notify the others.

The companies are Equifax, Experian or Trans Union.

Mr. Wenzl said step two is to close compromised accounts by calling all companies where an account has been tampered with.

He suggested following up with a certified letter to the company so that there would be a record of the account being closed.

The third step is to report the identity theft to the Federal Trade Commission by completing an online complaint form.

The undersheriff said the fourth step is to file a police report and get a report for your records.

“The purpose of all of this is to fix your credit rating at the end,” he said.

He said the card does not need to be stolen; just the information which could happen anywhere, especially when traveling.

“If you notice it when you get into Norton, come in and report it. But, if you notice it in Denver, report it there,” he said.

He said a suspect could ruin someone’s credit within a few hours.

“I think the biggest thing to do to prevent identity theft is to check your credit rating once a year,” he said.

Mr. Wenzl said there is a difference between identity theft and fraud, although both should be reported.

He said an example of fraud would be cashing an unknown check from another country.

More information on consumer fraud can be found at ic3.gov.

Sheriff's Log

NOTICE

The Board of Trustees of the Norton County Hospital recently completed the purchase of the property at 101 E. Warsaw Street, Norton. This property is adjacent (south side) to the Hospital's parking area located on State Street. On the property is a 40' x 29' home with a 12' attached garage. If someone has an interest in moving the home from its present location, or demolishing and removing the material from the location, the Governing Board is prepared to negotiate these terms. To express interest or view the property, please contact Ty Bruton, Director of Engineering, or Richard Miller, Administrator/CEO at 785-877-3351. Contacts relating to moving or demolition need to be made by September 1, 2009.

Need to be fasting (no food or drink after midnight) before the test

Tuesday, Aug. 25, 2009
 Time: 7:00 a.m. - Noon

NO APPOINTMENTS NECESSARY - FIRST COME, FIRST SERVE

QUESTIONS? CALL THE NORTON COUNTY HEALTH DEPARTMENT AT 785-877-5745

Profile #1 (Health Profile and CBC)\$40.00
 HEALTH PROFILE CONTAINS:
Electrolytes - (Sodium, potassium, chloride and total carbon dioxide) These are major indicators of kidney and hormonal functions. Electrolytes are essential for the body's acid-base balance and the operation of nerves and muscles, especially the heart.
Kidney Functions - (BUN, creatinine) These indicators are used to monitor kidney function.
Liver Functions - (Total albumin, globulin) These tests can be used in detecting and/or monitoring liver function damage, tissue damage or inflammation.
Alkaline Phosphate - (Uric acid, calcium, phosphorus) Used for detection and monitoring of bone, tissue and parathyroid disease, such as arthritis, gout, bursitis and lupus.
Glucose - This test is to measure blood sugar levels and is used to help diagnose/monitor diabetes mellitus.
Cholesterol - (Including HDL, LDL, VLDL, triglycerides and ratio of LDL/HDL) these are fats produced in the liver that combine with fatty oils in the blood stream. Cholesterol is further broken down and measured as HDL (good cholesterol) and LDL (bad cholesterol). The person who has higher levels of LDL is at greater risk of heart disease. Triglycerides determine the level of simple fats in the blood.
CBC - (Complete blood count with differential) This is a series of tests of the blood that provides a tremendous amount of information about the hematologic system, immune response and many other organ systems.

Profile #2 (PSA)\$20.00
 PSA - This test detects an enlarged prostate, infected prostate and/or prostatic cancer. It can be used to evaluate disease progression and to monitor treatment.

Profile #3 (TSH)\$15.00
 TSH - This test is used to evaluate thyroid function and detect if there is too much or too little hormone secreted by the thyroid.
