Fresh Asparagus in Spring

Seeing fresh asparagus in markets signals spring, yet shoppers who didn't grow up eating asparagus may pass it by - and miss out on one of the season's best vegetables.

Choosing and using fresh asparagus is easy. Here are some tips, beginning with how to choose fresh asparagus:

• Look for firm stalks with a rich green or violet-green color.

• Larger stalks typically offer the best flavor and quality; a thinner stalk can indicate toughness or late-season growth.

• Tips should be tightly closed. An open head happens when the weather warms and the head

grows too fast.

With white asparagus, other than color, the same tips apply. White asparagus is grown in low light, which does not allow it to absorb chlorophyll, which is responsible for the green color. The appearance is different, but the taste is the same.

Patricia and Paul Deiter

Couple celebrates 50 years

Patricia and Paul Deiter of Lan- cer, Iowa. sing celebrated their "50th" Wedding Anniversary on March 19.

Patricia Beck of Spencer, Iowa met Paul Deiter of Norton in Colorado Springs, Colo. where Patricia was attending nursing training Springs where they still reside and Paul was stationed at Ent Air

While in the Air Force, home included Taiwan, Vandenberg AFB, Turkey, Des Moines, Iowa and Altus AFB in Oklahoma.

They retired to Colorado part of the year.

To store fresh asparagus:

• Refrigerate after purchase. Trim the stem and wrap the bottom in a damp paper towel or stand up the stalks in a jar with enough water in the bottom to keep the stalks moist and fresh.

• Use fresh asparagus within two to three days after purchase. To cook fresh asparagus:

• Separate and, with a soft vegetable brush, wash each stalk

under cool running water. • Check the head of each stalk for garden debris.

• Snap (or cut) off the bottom

sandwich fillings, casseroles, and other side dishes.

In many recipes, asparagus can usually be substituted for peas or broccoli.

Cook whole stalks or cut pieces of asparagus to steam, stir-fry, oven-roast, microwave or grill. Cook until crisp-tender.

Nutritionally, asparagus is low in calories and high in fiber, potassium, folic acid, Thiamine and Vitamin A, C, and B6.

More information about using fresh vegetables is available at local K-State

Research and Extension offices Fresh asparagus can be eaten and by e-mailing Tranda Watts at raw or incorporated into salads, twwatts@ksu.edu.

Mid-Century GFWC met March 11 at the Norton Community High School for their annual Fine Arts Tea. Mrs. Victoria Robison, art instructor, welcomed everyone to the Norton Community High School art room. She said there are 92 students, seventh through twelfth grades, enrolled in art classes. At the present time there are 50 pieces of student art on display at the Hansen Museum, Logan, and 30 pieces of student art on display in McCook. So the club ladies were only able to view a small number of art pieces that the students have made this year. Students assisting Mrs. Robison were Shylo Paxton, Alec Gilgenbach, Kelsie Griffith, Anna Cummings and Grant McClymont.

After viewing the lovely and outstanding art display, the ladies made their way to the music room. Beverly Kindler welcomed everyone with the theme of the evening, "If you remove the rocks, the brook would lose it's song.' Special guests were the student musicians that were to perform that evening, and their families.
