A large group of people from the community worked Saturday at the American Legion building. The bushes around the building were cut and hauled off. Makes it look real nice.

There will be a couple of work days to get the crosses and flowers ready for the Jennings and Big Timber cemeteries and the Auxiliary will be getting the poppy arrangements ready for placing soon. Our next meeting will be at 2 p.m. on May 5.

The Jennings American Legion Post #351 would like to thank the family and friends of the members for the work done Saturday afternoon. LYLE NEWS

A graveside memorial service was held on Friday, March 29, for Jay K. Loey who was born in Norcatour to George and Virgie (Van Gundy) Loey in 1932. The family and friends gathered at the Educational Building in Norcatour for visiting and a snack. I accompanied Dorothy Ward to the cemetery, where Jay's grandson led a short service and military rites were performed by the Navy Honors Team of the Norton American Legion Post. We also visited briefly and I was especially glad to chat with Beverly Lintz.

June Jolly said that outside of some bruising, she didn't have bad effects from the recent car accident. She has played cards and led bingo since we talked to her last.

Kathy Van Meter and Lloyd Frandsen attended the "Gala" at Cambridge, the Tri-Valley Health

System annual benefit, which included music by the 10-piece Bobby Lane orchestra, a prime rib dinner and dance.

A delicious dinner followed the church service at Lyle last Sunday with a special pre-birthday cake for Toots Magers from her daughters. That evening, she went to Lebanon, Neb., for the pancake supper at the American Legion with Gary, Cathy and Keith Anthony.

Carol sent me the email thing about the goose named Maria and asked if it reminded me of "Ol Gus" and it did.

Our sons had a few geese for a few years, and what with coyotes and all, Gus was finally the only one left. He would wait until we had milked all the cows except two, and then he would come into the milk room, put his head in the station, and honk for food. Of

course, we would feed him, then he would go to the pasture with the cows.

Some of his tricks included pulling the car keys out of the trunk, pulling up our newly-planted cabbage plants (we have heard of weeder geese, so I guess he thought he was helping, or else he just didn't like cabbage) and he decided he had to be my protector and tried to chase my husband and sons away. At the sale, the auctioneer told buyers about the goose who thought he was a cow.

Service

(Continued from Page 1)

put in at least 60-hours due to runs and the inspection last week.

The service will probably not be hiring any new people in the near future, she noted, because a lot of emergency workers are dropping their certification because of increasing state regulations.

"This has to be your passion or you get burned out pretty fast," she said. "You're pretty much always on call even if you're not

on front call.

"With EMS we have to take our jobs so seriously because it's frequently life and death."

The service has five ambulances, she said. One is stationed in Almena, one in Lenora and three in Norton. For the inspection, the ambulances were all shuttled back and forth to Norton so that they could be inspected and the smaller towns not left without during that time.

• In other business, the commissioners:

• Heard that the emergency medical service had received a grant for a new defibrillator. The \$35,000 machine will be paid for by \$28,000 from the grant and a \$7,000 match from the medical service budget.

• Held a 15-minute closed session with Wyatt and County Clerk Robert Wyatt to discuss non-elected personnel.

The Wrist Cath

A New Path to the Heart

An important new alternative to traditional cardiac catheterization – transradial, or wrist, catheterization – is now offered by DeBakey Heart Institute and Dr. Richard Markiewicz, interventional cardiologist.

For patients who meet the criteria, Dr. Markiewicz uses the radial artery, located in the wrist, as the access point for catheterization procedures rather than the femoral artery in the groin.

Wrist catheterization can:

- Improve patient comfort
- Decrease recovery time
- Reduce chance of bleeding complications
- Provide less stress for most patients

Each patient must be evaluated individually to determine whether wrist catheterization is appropriate for them. For more information call 888-625-4699 or ask your primary care physician.
