Kansas State University will host its 2014 Horticulture Field Day in Colby on Aug. 13 with a little something extra to celebrate. This year marks the 100th anniversary of research and outreach at the university's Northwest Research-Extension

The field day starts with registration at 5:15 p.m. and a guided tour of the grounds at 5:30 p.m., plus a welcome and brief overview of the center's history by Bob Gillen, head of K-State's Western Agricultural Research

The program starts at 6:15

p.m. Topics and K-State Research and Extension speakers include:

· Tree selection and care for northwest Kansas - Holly Dickman, Ellis County extension horticulture agent;

· Turfgrass selection and care for northwest Kansas - Jared Hoyle, extension turfgrass spe-

Shrub selection and care for northwest Kansas – Cheryl Boyer, extension ornamental nursery crops specialist; and

· Prairie Star annual flower trials – Alan Stevens, extension floriculture specialist.

Attendees are encouraged to bring in samples from their home gardens for identification and diagnosis.

Members of the K-State Research and Extension Thomas County Master Gardeners will be on hand to share information about the Master Gardener program, and Duane and Jo Cheney, owners of Sharing the Bounty Garden Market will be available to talk about the Community Supported Agriculture Program.

More information is available by contacting Vicki Brown at 785-462-6281.

Seminar's focus on export opportunities

In a world of expanding international opportunities, many Kansas farms, ranches and agribusinesses are beginning to explore exporting as an additional source of income. The Kansas Department of Agriculture (KDA) is working with Kansas farms, ranches and agribusinesses to acquire the necessary tools and knowledge to become a competitive force in global markets. The Department of Agriculture's agricultural marketing division will partner with the U.S. Food Export Association of the Midwest and host an exporting seminar in Olathe, Aug. 20.

This event will provide farms, ranches, agribusinesses and food companies the opportunity to learn about export basics, have export-related questions answered by professionals, find potential international buyers for their products and more. "Kansas companies are finding that the export market can be a good option for growing their businesses. We have seen a 64 percent increase in Kansas agricultural exports since 2003," said J.J. Jones, Kansas Department of Agriculture international trade director, referencing data from the U.S. Department of Agriculture Foreign Ag Service. "This educational opportunity will provide valuable resources to help businesses explore new opportunities and gain a better understanding of the process involved to deliver products into a foreign market."

"The Best Ways to Get Started in Exporting," is geared for Kansas food processors who want to learn about what it takes to become successful when exporting products. The all-day training will include developing export readiness skills, learning about export shipping and documentation, and navigating free trade agreements, among other useful topics. When a business begins exporting products, it gains access to a new, large group of consumers and it benefits the U.S economy. According to the Food Export Association of the Midwest, for every one billion dollars in agricultural exports, the U.S benefits about 12,000 American jobs.

The registration fee to participate is \$50. To learn more about this seminar or to register for the event contact the Kansas Department of Agriculture International Trade Director, J.J. Jones at (785) 215-5114 or at JJ.Jones@kda.ks.gov.

Businesses are encouraged to sign up at the Food Export Association of the Midwest website by Aug. 13.

Farmers reminded of conservation changes

Agriculture Secretary Tom Vilsack recently reminded producers that changes mandated through the 2014 Farm Bill require them to have on file a Highly Erodible Land Conservation and Wetland Conservation Certification (AD-1026). The Farm Bill relinked highly erodible land conservation and wetland conservation compliance with eligibility for premium support paid under the federal crop insurance program.

"It's important that farmers and ranchers taking the right steps to conserve valuable farm and natural resources have completed AD-1026 forms on file at their local Farm Service Agency office," said Vilsack. "This will ensure they remain eligible for crop insurance support."

For farmers to be eligible for premium support on their federal crop insurance, a completed and signed AD-1026 form must be on file with the Farm Service Agency. Since many Farm Service Agency and Natural Resource Conservation programs have this requirement, most producers should already have an AD-1026 on file. If producers have not filed, they must do so by June 1, 2015.

When a farmer completes the AD-1026, Farm Service Agency and Natural Resource Conservation staff will outline any additional actions that may be required for compliance with the provisions. The Risk Management Agency, through the Federal Crop Insurance Corporation, manages the federal crop insurance program that provides the modern farm safety net for American farmers and ranchers.

Since enactment of the 1985 Farm Bill, eligibility for most commodity, disaster, and conservation programs has been linked to compliance with the highly erodible land conservation and wetland conservation provisions. The 2014 Farm Bill continues the requirement that producers adhere to conservation compliance guidelines to be eligible for most programs administered by Farm Service Agency and Natural Resource Conservation. This includes the new price and revenue protection programs, the Conservation Reserve Program, the Livestock Disaster Assistance programs and Marketing Assistance Loans implemented by Farm Service Agency. It also includes the Environmental Quality Incentives Program, the Conservation Stewardship Program, and other

conservation programs. Farm Service Agency recently released a revised form AD-1026, which is available at United States Department of America. For more information,

Agriculture Service Centers and online at: www.fsa.usda.gov. United States Department of Agriculture will publish a rule later this year that will provide details outlining the connection of conservation compliance with crop insurance premium support. The announcement was made possible by the 2014 Farm Bill. The Farm Bill builds on historic economic gains in rural America over the past five years, while achieving meaningful reform and billions of dollars in savings for taxpayers. Since enactment, United States Department of Agriculture has made significant progress to implement each provision of this critical legislation, including providing disaster relief to farmers and ranchers; strengthening risk management tools; expanding access to rural credit; funding critical research; establishing innovative public-private conservation partnerships; developing new markets for rural-made products; and investing in infrastructure, housing and community facilities to help improve quality of life in rural

Vaccinating
