Red Hat Mamas

On a lovely fall day, Sept. 16, 10 Red Hat Mamas plus guest, Lily Ruth Edmonston, journeyed to Wray, Colo.

Shopping on Main Street prior to a tour of music boxes kept the interest of the group intact. The collection of music boxes, over a span of 50 years was varied. Countries represented were China, Germany, Holland, Ireland, Russia and most of the United States including Hawaii. The phenomenal assortment of

music boxes and the beautiful songs, sparked the imagination of riding on a carousel, looking at a Christmas tree or being at the ocean.

The ladies appreciated the host for allowing them the privilege of seeing these unique music boxes.

Queen, Phyllis Wingfield, read a couple of humorous stories followed by lunch at the Wray cafe.

The October meeting will be on the 21st.

Sept. 21-27 marks Child Passenger Safety Week.

Results show that three out of four child safety seats are improperly installed in vehicles. The National Highway Traffic Safety Administration reminds parents and caregivers that it is their responsibility to make sure children are safely restrained — every trip, every time.

The Traffic Safety Administration reports that 8,325 lives of children under the age of 5 have been saved by the proper use of child restraints during the past 30 years. Research shows that child restraints provide the best protection for all children up to the age of 8; after age 8, seat belts provide the best protection.

There are four "Steps for Kids" guidelines for determining which restraint system is best suited to protect children based on age and size:

1) For the best possible protection, keep infants in the

back seat, in rear-facing child safety seats, as long as possible up to the height or weight limit of the particular seat. At a minimum, keep infants rear-facing until at least age 1 and at least 20 pounds.

2) When children outgrow their rear-facing seats, they should ride in forward-facing child safety seats, in the back seat, until they reach the upper weight or height limit of the particular seat. This is usually around age 4 and 40 pounds.

3) Once children outgrow their forward-facing seats, they should ride in booster seats, in the back seat, until the vehicle seat belt fits properly. Seat belts fit properly when the lap belt lays across the upper thighs and the shoulder belt fits across the chest. This is usually when they are age 8 or when they are 4-feet, 9-inches tall.

4) When children outgrow their booster seats, they can use the adult seat belts in the back seat, if they fit properly.

Be safe and buckle your children in proper-used child restraints.
