Great Tips

- Candles will last a lot longer if placed in the freezer for at least 3 hours prior to burning.

- To clean artificial flowers, pour some salt into a paper bag and add the flowers. Shake vigorously as the salt will absorb all the dust and dirt and leave your artificial flowers looking like new! Works like a charm!

Fortunately, Hays Med's Dr. Kirk Potter, plastic surgeon, offers a broad spectrum of reconstructive surgery options to those facing the lasting effects of illness or accident. Not only does reconstructive surgery restore functionality and improve appearance, it can provide significant emotional benefits by helping patients feel more confident and able to live their lives again.

A tailored approach to surgery

Just as each patient's issue and needs are unique, so are the treatment plans devised by Dr. Potter. He carefully evaluates each individual and recommends a surgical treatment based on a detailed medical

history, the patients' desired results and medical necessity.

Types of surgery

Dr. Potter is skilled in the latest technologies and treatments, including the following:

- Reconstruction after cancer surgery. Surgery can be performed to repair damaged tissue and restore a patient's appearance and function. Dr. Potter specializes in breast and skin cancer reconstruction.
- Flap procedures. These delicate surgeries help severely injured or disfigured patients by replacing or reconstructing parts of the body affected by injury or disease.

- Burns. Treatment of new or old burns with wound care and skin grafts address scarring, functional loss and appearance.

- Breast Surgery. Reconstruction after mastectomy is performed to optimize aesthetic results. Breast reduction is used to alleviate back and neck pain.
