The Kansas Honors Program celebrates its 40th anniversary

this year. Each year, the Kansas University Alumni Association and its volunteers host 41 programs that reach all 105 counties across the state.

During the ceremony, each student received an American Heri-

tage Dictionary, in both hardback and electronic versions, presented by Michelle Miles, assistant director of Kansas programs for the Kansas University Alumni Association.

# The Wrist Cath

## A New Path to the Heart

An important new alternative to traditional cardiac catheterization – transradial, or wrist, catheterization – is now offered by DeBakey Heart Institute and Dr. Richard Markiewicz, interventional cardiologist.

For patients who meet the criteria, Dr. Markiewicz uses the radial artery, located in the wrist, as the access point for catheterization procedures rather than the femoral artery in the groin.

Wrist catheterization can:

- Improve patient comfort
- Decrease recovery time
- Reduce chance of bleeding complications
- Provide less stress for most patients

Each patient must be evaluated individually to determine whether wrist catheterization is appropriate for them. For more information call 888-625-4699 or ask your primary care physician.
