Agriculture Week recognizes farmers

tional Agriculture Week.

Established in 1973, Ag Week has been an opportunity for the American people to say "thanks" to those hard-working men and women of agriculture. Check Page 7 in this issue to see all of those businesses saluting these hard working people.

Despite the dwindling rural population, the business of farming and ranching remains an integral function of the Kansas economy. Twenty-five percent of the state's economic activity can be connected with agriculture, while as much as 42 percent of the state's total exports are agriculture-related.

The population in the state of Kansas is growing but the urban and suburban communities are gaining people while the rural farming communities are losing ground. There are fewer people in the rural areas but the demand for agricultural commodities is greater than ever. American farmers produce 16 per-
