

# New windmill promotion approved

After dedicating a new \$8.59 million bridge across the Republican River west of Scandia, the U.S. 36 Highway Association members approved a windmill promotion which they hope will draw traffic to the northern Kansas route.

Meeting June 13 at the Scandia Community Center, the association also discussed a feasibility study which would look into the possibility of developing U.S. 36 into a four-lane highway.

They heard reports about current U.S. 36 construction and maintenance by district engineers from the Kansas Department of Transportation. In addition, a report about highway financing was presented during the lunch hour by Jim McLean, a special assistant to Transportation Secretary Deb Miller.

Mr. McLean said the department was a little behind on money with the continuing state budget crisis, but the secretary thinks they can complete the core projects in the current highway plan. The agency is operating with a \$447 million deficit in the 10-year program at present, he said, and a larger deficit would cause problems.

"Next year is decision time," Mr. McLean said. "If you support the highway program, legislators need to hear from you now."

Next year is the year when Kansas will determine whether the present road program continues, he said.

President Steve Haynes of Oberlin led the dedication ceremony near the east approach to the new concrete bridge as a crowd of about 100 people watched.

The group heard brief remarks by Second District Engineer Donald Drickey of Salina, who said "this was a much-needed project, in our estimation."

State Sen. Janis Lee of Kensington praised Governors Mike Hayden and Bill Graves for developing the state's highway program, and thanked transportation officials for their work and dedication.

The U.S. 36 bridge was completed in the fall and is in use. Traffic was traveling across it as Sen. Lee cut the ceremonial ribbon. Then members and guests enjoyed a steak dinner at Scandia Community Center.

Rep. Jerry Moran intended to be present for the bridge dedication, but missed the ceremony because of an airport flight delay.

State officials present included Sen. Lee, a Democrat from Kensington, and Reps. Clay Aurand of Courtland, John Faber of Brewster, and Sharon Schwarz of Washington, all Republicans.

During their afternoon meeting, association members decided to

## Man credited

Stanley L. Carlock was honored on Friday, June 13 by the U.S. Corps of Engineers at Engineers' Day in Omaha, Neb. The Corps inducted Stanley into its Gallery of Distinguished Civilian Employees.

Carlock is a graduate of Haigler High School and the University of Nebraska.

## Rail lane causes traffic delays

The U.S. Highway 36 Association heard reports from highway officials about projects along the route during its annual meeting last week in Scandia.

Roy Riskey of Topeka, district engineer in Topeka for the Kansas Department of Transportation, highlighted U.S. 36 projects in northeastern Kansas.

The largest is a \$45 million project at Marysville, now under way, which includes a new bridge over the railroad and the Blue River. This is a cooperative venture between the state, the Union Pacific Railroad, and the Army Corps of Engineers.

The rail line there carries 70 to 80 long trains a day, and this had resulted in major delays for U.S. 36 traffic. The project includes levee work and moving the railroad tracks.

Mr. Riskey described seven other projects which are planned between Marysville and the Missouri state line. These involve interchanges, new road alignments, grade separations, overlay work, and a four-lane section from Troy to Wathena.

The District 2 report for north-central Kansas was presented by District Engineer Donald Drickey of Salina.

Mr. Drickey described a \$4.6 million project covering 6.4 miles west of Mankato in Jewell County. It includes surface rehabilitation, spot grading, and replacing the Limestone creek bridge.

Another Jewell County project will be 9 miles of surface rehabilitation east of Mankato's city limit at a cost of \$4.89 million. A third project includes curb and gutter, storm sewer and inlets at Mankato, 0.25 mile long and costing \$189,628.

Washington County projects include overlay and bituminous seal from about one mile west of the U.S. 36/K-148 junction to the Washington/Marshall County line, and seal from the east edge of Washington to the vicinity of the U.S. 36/K-148 junction.

Next year, Mr. Drickey said, the department would resurface the west end of the four-lane highway west of Marysville, lay 1-inch overlay in Washington County, and fill ruts on the highway into Washington.

The northwest Kansas report was given by District Engineer Chris B. McDiffett of Norton. The 2003 projects include the replacement of the Norton railroad bridge at a cost of \$5.6 million, and overlay from West Street in Norton to the east county line.

Projects for 2004 include seal from the west junction of K-27 to its east junction through St. Francis, a seal from the west Decatur County line to Oberlin; and a major modification from the west junction of K-383 to Norton.

Mr. McDiffett added that little was planned for Phillips and Smith counties, as that stretch of highway has received overlays in recent years. He pointed out that, in Smith County, the state has helped plant highway windbreaks in partnership with landowners and the U.S. Department of Agriculture.

The sources of state highway funds were listed by Mr. McDiffett—with the major income being 32.1 percent from the fuels tax, 22.2 percent from federal funds, 11 percent from vehicle registrations, 9.2 percent from the sales tax, and lesser amounts from other sources.

President Steve Haynes recalled that the U.S. 36 Association board met with Colorado highway offi-

cial about five years ago. Since then, he said, Colorado has and rebuilt the highway all the way to Last Chance.

"They've done a section every year, and have done a good job for us," Mr. Haynes added. "There are more Kansas tags than Colorado tags on that road."

He noted that most of U.S. 36 in Missouri has been converted to four lanes, with the exception of a 65-mile gap. No report was available for the Illinois section of the highway.

The federal highway situation was described by Brian Low, a new federal highway official in Topeka. He said recently traveled U.S. 36 and reported lots of resurfacing in Illinois. He noted that the Hannibal-to-Macon section in Missouri was not good; and said Kansas was ahead of Missouri in repairing roads.

Mr. Low described the problems that Congress faces in funding highway work, and added that federal funds make up about 30 percent of the Kansas highway budget. Safety is the highest federal priority, he said. A highway isn't guaranteed more funds because it is a part of the Federal Highway System, he added.

Sen. Janis Lee reported that the Kansas Legislature has a strong dedication to transportation, and felt that highway funding was OK. The demands for education and Medicaid funds have increased, she said, and this has hurt other programs. With declining state revenues, there is competition for highway dollars, Sen. Lee pointed out, but the Legislature has a dedication to transportation. She hopes these problems will be alleviated by a rebound in the economy.

move forward in promoting the highway as a route of windmills. This idea was suggested by Smith Center Mayor Larry Brown during the U.S. 36 fall meeting in Smith Center.

As chairman of the windmill committee, Penny Zeller of Seneca suggested a slogan, "Ride the Wind on U.S. 36 . . . Travel the Trail of the Windmills."

The group approved her suggestion of signs carrying this message, with markers along the route wherever windmills are located. They will incorporate a picture of a windmill and the U.S. 36 shield logo.

Cy Moyer of Phillipsburg said he had researched the cost of large signs at the Missouri and Colorado borders which would invite travelers to take the road. The group authorized him to proceed with one or two 8-by-20-foot signs carrying the windmill theme at a cost of \$2,000 to \$2,500 each.

Mayor Brown reported information about a six-county Highway 50 expressway study that was completed in the area around Dodge City and Garden City. He learned that the commissioners of six counties in that area had paid the \$42,000 cost of that study.

President Haynes said the U.S. 36 Highway Association should

move ahead with a four-lane feasibility study for their route across northern Kansas.

With extremely heavy traffic on Interstate 80 to the north, he pointed out, many travelers are searching for a less-congested route and U.S. 36 could benefit from that. In addition, he said the people of northern Kansas deserve better roads.

While no money would be available for some time, Mr. Haynes said this study should be completed and presented to the state so that U.S. 36 would be in line for funds in the future.

"We need a plan or we won't get anything," he said.

Mr. Haynes urged the directors to find active members for the association's board. The group also heard and discussed an idea for a 400-mile garage sale along their Kansas route, which could draw a great deal of traffic.

The current officers were re-elected. They include Jim

Erickson of Scandia, who organized the Friday meeting, vice-president; Mr. Moyer of Phillipsburg, executive vice-president; and Bonnie Youngquist of Kensington, secretary.

Next fall's board meeting will be hosted by Phillipsburg, and the 2004 annual spring meeting is scheduled at Hanover.

## Obituary

### Helen Marie Elliott

Helen Marie (Weddle) Elliott, 91, wife of Clark Elliott, died on June 3, 2003, at her home in Littleton, Colo. She was born Dec. 12, 1911, at Plymouth, Mo. Helen graduated from Idalia School in 1929.

Funeral services were held at University Church of Christ on Sat-

urday, June 7 with Reverend David Thurman officiating. Pallbearers were George Kovach, Douglas Cook, Curt Burton, Brad Yongue, Tim Elliott and Ray Hatch. Burial was at Fairmont Cemetery in Denver.

Cards of sympathy may be mailed to Clark Elliott, 5922 S. Birch, Littleton, CO 80121.

## Alumni Gatherings

### Class of 1943

The class of 1943 with 49 graduates held their 60th reunion celebration at the senior center from 2 to 4 p.m. on Saturday. Twenty-one classmates spent time reminiscing and visiting.

Those attending were Dora Ludwig Knapp, Burlington; Darlene Zimbelman Schultz, Neosha, Mo.; Alice Rae Miller, Calif.; Joy Rae Hunter and son Chuck, Saginaw, Mich.; Betty Raile Meads and daughter Denise Kay, Indianapolis, Ind.; Lila Ruth Finley Oster, Boulder, Colo., and daughter Linda Baker, Arvada, Colo.; Andy Denison, Minneola; Glenn and Vernie Anderson Combellick,

Littleton, Colo.; Robert and Doris Duncan Dallon, Bristol, Conn.; Glenn and Alice Cook Ballinger, Atascadero, Calif.; Bob and Opal Brown Phillips, Manhattan; Ed and Marjorie Thomas Kadhub, Windsor, Colo.; Clifford and Yvonne Juhl Sesson, Grant, Neb.; Albert and Bessie Halley Burr, Jessie Halley Schields, Hattie Poulignot Terry, Joyce Carmichael Wiley, Dulcie Rath Henderson, Ben Andrist, Wendell Kite and Darlene Boll Feikert, all of St. Francis.

After attending the banquet at the high school, more visiting was done at the senior center. On Sunday, many of the group had breakfast together at the Windmill Restaurant.

## Tri-State Lumber "Paints Plus"

Will be open Friday, June, 20 at 8:00 a.m. for all your painting and redecorating needs.

Offering "matchrite" computer paint matching

- We can match any brand of paint or color

- We can remix or change already tinted paints

- We offer virtual customer painting, the customer can change the colors of their house or a certain room using our computer, letting the customer feel certain about their paint choices

- We offer accent matching—the customer can pick from several trim or accent colors to match a certain base or main color

- We will continue to offer the Valspar paint line, which has been supplying paint since 1806. Valspar paint has been rated #1 in "consumer reports" paint tests for several years.

- We will have expanded paint and painting accessories inventory for all your painting projects and needs.

Stop In and See Our New Paint Store, See What We Can Do For You!
