

# Let the **Gorilla** help sell your stuff

## If you're planning a garage sale, be sure it's in **The Country Advocate**

Invite the 900-pound Gorilla to help with your garage sale. You'll have more customers, sell more stuff and make more money. That means more in your pockets at the end of the day, and less junk to haul off to the dump.

How does it work? Simple. While the paper reaches most families in the town, The Country Advocate goes all over northwest Kansas. It reaches 41,860 readers in 11 Kansas counties, plus parts of northeastern Colorado and southwest Nebraska.

That's why it's the 900-pound Gorilla of Northwest Kansas Advertising, reaching more homes and more people than any other publication, broadcast station, cable system, Internet page or advertising medium.

Reader after reader has tried The Advocate for their advertising. The results?

Stuff sells. People drive for miles to find a good sale. They don't want to walk away empty-handed. The Gorilla works.

Your newspaper makes it easy for you to be in The Advocate. Just call or stop by and place your ad. You'll be surprised how easy it is, and how affordable. You'll be surprised — and happy — when your phone starts to ring or people show up at your door.

But call today. Deadline for The Advocate is noon Friday, ONE WEEK BEFORE a weekend sale. Sure, you can get an ad in the paper later, but it won't be the same. Call the Gorilla.

Colby Animal Clinic  
**PAWZ AND REFLECT**  
Animal Care Tidbits for You & Your Pets!  
**INTERNAL PET PARASITES: WHAT YOU NEED TO KNOW IN SHORT!**  
\*Roundworms- Both dogs & cats - (Ingestion of soil, feces and environment.) These can infect humans. \*Hookworms-Both dogs & cats - (3 common ways to get) 1. Migrate through the skin. 2. Ingestion of soil, feces, etc. 3. A mother's infected uterus or milk. These can infect humans. \*Whips- Both dogs and cats - (Ingestion of Soil, feces.) These are not passed to humans. \*Tapeworms-Both dogs & cats - (Ingestion of fleas & mice, lice or other animals.) This parasite needs an intermediate host and uses the mouse or flea (examples) as an incubator before it infects the host (your pet). Tapeworm in humans is a different species. \*HEARTWORM-Both dogs & cats - These must carry by a vector (mosquitos), and unlike the above parasites, after several months of developing, the microfilaria travel through the bloodstream to the heart. \*Coccidia-both dogs & cats - (Ingestion of soil & feces) More likely in young animals. \*Giardia-Both dogs & cats - (Ingestion, inhaling and sniffing of the infected cyst stage through contaminated ground or water) This is not a worm, it is a simple one-celled parasite species. HORSES can also suffer from Internal Parasites such as Roundworm & Bots!  
For Prevention, testing, treatment or questions about Pet parasites Please Call Colby Animal Clinic 785-460-8621 Next Month "External Parasites!"
