When does research to save lives actually hurt lives?

An audience in Colby got

closer to that answer. The last speaker in the

Max Pickerill Lecture Series at Colby Com-

J. Robert munity College Tuesday informed the audience about the ethics of stem cell research and cloning. Dr. Jason Scott Robert, a bioethicist at Arizona State University, gave a lecture titled "Cloning, Chimeras

the Big Top. He is a member of the Stem Cell Network in Canada and is on the Institute Advisory Board for the Institute of Population and Public Health, which is part of the Canadian Institutes of Health and Re-

and the Stem Cell Circus: Under

"I'm a philosopher by training," he said, adding he has a "weird gig" because he has a lab, but doesn't do any research in it.

Robert said cloning, chimeras and stem cell research are all separate entities, but the intersection of the three is "fantastical."

"That is where the moral and scientific issues come to light," he

Stem cells are cells that have potential to become almost any

tissue or organ in the body. Robert explained the basic sci-

entific principal of where stem cells originate. He said he wasn't going to of-

fer answers, but create a "good moral discussion."

In developmental biology, cells in a fertilized egg start to take on different characteristics after

stage, there is an inner cell mass that gives rise to stem cells.

"Maybe we can harness the pocine," Robert said.

At week two, the cell mass im-

issues, matches speakers long time to get," said Cathy Gor-

Stay tuned to the news because college. somebody who knows something about it may be in Colby

Tuesday was the last speaker of the 2005-2006 Colby Community College's Dr. Max Pickerill and schedule speakers. Lecture Series. For the past 10 of the committee was Vic Oelke. He taught history and political science at the college for many years and is now deceased.

It was originally known as the CCC Speakers Bureau. In 1998. Pickerill was celebrating his 50th year as a teacher. In honor of that achievement and his dedication to students and the field of education, Oelke suggested renaming the series "The Dr. Max Pickerill Lecture Series."

But even though the series is done for another school year, it does not mean the committee is finished with its work.

"We try to do a whole year in

don. She serves on the selection committee and teaches art at the

In addition to Gordon, the committee has two residents, one college faculty member and two students. The committee meets four times a year to review issues

"We look at the topics that are years, a committee has invited timely or big," Gordon said. "In people from across the country to the past, we try and get one politicomment on the latest issues in cal person. We like to get differthe news. The original chairman ent areas, like history and science.

"This year we did both."

For example, Gordon said the committee is interested in the use of steroids by athletes. For months now, steroid use by Major League Baseball players has been in the headlines. The committee is searching for the right person to comment about steroid use, including use at the college

The committee is also keeping up with other current issues like immigration and oil production. Committee members research various people on one topic.

about four days' growth. At this mother feels her child move.

At week 20, viability and the capacity of awareness exist and at week 40, birth

"These are the aspects of the biology," he said, adding the political debate emerges when people start to talk about moral "personhood" at

"That's the root of controversy on abortion, the moral status of the

Stem cells are a separate issue from abortion. In 1997, scientist Jamie Thomson cultured stem cells from frozen embryos. A year later, another research

at Johns Hopkins created stem cells using an aborted fetus.

After that, then President Bill Clinton had some concerns about the research.

Robert said at the same time. scientists began to see the potential in the research — drug and toxicity testing, and more importantly, tissues or cells for transplantation to treat illness like bone marrow disease, Parkinson's, or diabetes.

"We're still not there yet," he

Since the research began, the

ethical issues have arisen. The source of stem cells has received the most attention because blastocysts stop developing. Other issues are the devaluation of human life, sources of eggs and informed choices.

"Eggs are hard to come buy because they're not easy to get from women, and there are concerns about coercion," Robert said. There are also issues about the physical and psychological risks of donation and privacy.

Robert said there are people who don't want to see embryos created and then destroyed to get

"Some people get very, very concerned that this is a very inappropriate way for scientists to be behaving," he said.

Another moral objection is using frozen embryos from fertility treatments for infertile couples.

Robert estimated there are up to 500,000 embryos in cryogenic suspension. If the embryos are

Assistant principal duties are meeting, a search committee for the position recommended high school social studies teacher and head wrestling coach Mitch Beims.

However, a motion to approve Beims died when no one made a "They're scheduled a year ahead second to Stan Molstad's motion.

County health insurance increases

By Jan Katz Ackerman Colby Free Press

Thomas County employees face

a rate hike for their health insurance starting in July.

Shield group consultant for the

county, told commissioners Ron Evans, Paul Steele and Ken Christiansen of the increase on Friday. Each county employee has the option of enrolling in the county's

health and dental insurance plan. The county pays for the employee's insurance, and the employee has the option of taking out insurance on his spouse or children. This year, an individual policy

cost the county \$298 a month, of which the employee paid nothing. A family plan cost the county \$917 a month, of which the employee pays \$619. "We think medical costs will in-

crease 8 to 9 percent," Krull said. "If consideration it will probably be 12 percent which will be about \$40 per policy."

group, 50 percent of the claims for 2006 have been generated by two

"You had two significant claims this year," Krull said.

"Right now, you are \$44, 606 dollars in the hold.

"We are not trying to recoup that money, but we are trying to rate you there is a 32 week wait on delivery accurately."

County employees also have the option of taking advantage of a \$50,000 term life accidental, death and dismemberment plan.

That plan costs employees \$18 per month. Krull said Blue Cross Charles Krull, Blue Cross Blue Blue Shield paid one claim in 2006 on this option. The county's policy runs from

Krull said of the 48 people in the county should purchase a new compactor for the landfill. According to landfill director

Larry Jumper a new compactor could be purchased on a seven-year lease plan for \$250,000 with annual payments being \$43,054.

The county would receive a \$72,150 trade-in allowance and of the equipment.

House moves closer to Senate stance on school finance

TOPEKA (AP) — House leaders cher pension contributions. will find out today whether they convinced enough Republicans to stay on board and send the Senate a \$532.7 million, three-year school finance plan.

On a 63-62 vote early Tuesday evening, the bill advanced to final action. Passage on Wednesday would return it to the Senate, modified heavily with policy provisions but smaller than the \$541 million approved by senators last week. Negotiations on a final version could begin later in the day.

Both plans include additional money for all school districts, money for students at risk of academic failure, increases in special education and \$75 million in tea-

House Speaker Doug Mays said he expected the bill to pass Wednesday by the same margin, and said the day from out it's better than the \$633 million plan of state and cast passed by a coalition of moderate the deciding Republicans and Democrats in vote for O'-March and reinserted temporarily into the bill Tuesday.

"It's a stronger position because fellow conserleadership's behind it," Mays, R-Topeka, said of the bill. "It's not that cans cheer. far from the Senate plan. I still hope we have support for a bipartisan
