

## Beetle Bailey • Mort Walker

This is a logic-based number placement puzzle. The goal is to enter a number, 1-9, in each *cell in which each row,* column and 3x3 region *must contain only one* instance of each numeral. The solution to today's Sudoku puzzle is right.

Opening	g lead — I	king of dia	monds.

I remember as though it were vesterday the first time I played against Sylvia. My introduction had come on the previous deal when I opened one spade, Sylvia passed, my partner bid two spades, and Sylvia's partner bid three spades.

This cuebid, announcing a huge hand void of spades, was not in Sylvia's repertoire at that time, and she cheerfully passed, holding J-x-x-x of spades and little else. Her partner could have made six clubs, but at three spades he went down four!

When her spluttering partner asked Sylvia why she had passed, her reply was to some extent logical. With both opponents and her partner bidding spades, she felt her partner was the one to be trusted. That ended the brief discussion, her partner having been struck speechless!

The next deal, the one shown, revealed Sylvia's versatility. West led the A-K-Q of diamonds, Sylvia (South) ruffing the third round as I discarded a spade from the East hand.

After leading a low heart to the nine, Sylvia ruffed another diamond and led a low club to the queen. I took the ace and returned a club. Sylvia cashed the K-J, then played the K-Q of hearts, overtaking with dummy's ace.

At this point, dummy had the jack of hearts and Q-9 of spades, I had the K-J of spades and ten of clubs, and Sylvia had the A-7 of spades and eight of clubs.

Sylvia cashed the jack of hearts, and I was in deep trouble. If I discarded a spade, she could discard a club and make two spade tricks. Instead, I let go of the club, and she discarded a spade. She then took the last two tricks with the spade ace and eight of clubs.

In effect, Sylvia had executed a dummy reversal followed by a squeeze! However, she could never understand why I discarded the high club!
