Today's Cryptoquip Clue: H equals O

Opening lead — queen of spades.

How to Deal With a Damsel

The simplest hands are some times the hardest ones to play correctly. Witness this deal where South was in four hearts and West led the queen of spades.

South won with the ace and led a trump to West's ace. West re turned the jack of spades, and East ruffed dummy's king and returned a club. South finessed and lost the queen to the king, and West cashed the ten of spades to put the contract down one.

Unlucky, you could say, but the unadulterated truth is that declarer botched the play. Before playing to the first trick, South should have considered what might happen if West had six spades for his one-spade overcall.

He might then have seen the wisdom of taking the opening trick with dummy's king in order to prevent East from ruffing it later.

After winning with the king, he would next lead the king of hearts from dummy.

West would take his ace and lead the jack of spades, but East would find himself in a helpless position.

If he ruffed the spade, South would follow low from his hand, and his only other loser would be a club, thus making four hearts.

The hand illustrates, for the umpteenth time, why a declarer should not play quickly at trick one.

That is the time when he should collect his thoughts, being careful to give consideration to the bidding by the opponents as well as the significance of the opening lead.

He should then form a general plan of play and be prepared to alter it should any unexpected development occur.

Tomorrow: Bidding quiz.
