## as grandchildren Imagine getting a call about one of your grandchildren. The

caller says he or she is traveling overseas, has been arrested, and needs money for bond.

Many grandparents would be sympathet-

ic to this situation and would want to do what they can to help their grandkids out in a crisis. Only after wiring several thousand dollars to a foreign account do these grandparents find out that their grandson or granddaughter has been safe at home the entire time.

Scammers pose

They have just fallen victim to a common scam.

While this scam has been around for a long time, the scam artists are becoming more sophisticated. Information available on Internet sites, such as Facebook, has made it easier for scammers to find out enough information about someone to sound believable to a grandparent - just another reminder to be careful about what you share on social networking sites and whom you share it with.

The best way to avoid becoming a victim of this scam is to be very skeptical of the caller's story. While it can take a few different forms, the basic idea is the same. A grandchild is in a foreign country, and has been arrested, mugged or otherwise lost his or her money. He or she needs some wired right away so he or she can get home. Often the caller will ask the at (800) 432-2310 or visiting us grandparent not to tell other fam- online at www.ksag.org.

Social Security District Manager in Havs

Superheroes old enough

Some of the strongest and most youthful superheroes to jump from the pages of comic books to the silver screen in recent years are old enough to be receiving full Social Security retirement benefits. Whether standing before the bat-computer or going online at the fortress of solitude, these guys were certainly wise enough to apply for retirement benefits at www.socialsecurity.gov.

Superman may be America's cent years. The man of steel was retirement benefits. Come to think created in 1932. The guy's 79 years old and he has a new movie coming out in 2012. Superman does mostly volunteer work, but even if he earns wages as Clark Kent, his benefits won't be offset since he reached his full retirement age. Batman made his debut in 1939, and he's about to star in another feature film, running around like a 30-year-old. Also in his 70s, Mr. Wayne is getting full retirement benefits – and Robin too. The same can't be said for the Joker or Penguin; you can't collect benefits while you're in prison. The Green Lantern and Captain America made their silver screen away into an active retirement! debuts this year. They were "born"

to draw Social Security in 1940 and 1941, and also are of retirement age. One would expect Captain America to look a little more like Uncle Sam these days, but as is true with many Social

Security retirees today, staying active keeps him young. For the "silver age" of comic

book heroes, retirement isn't quite here yet. Spider-Man slung his first web in 1962, the same year the incredible Hulk burst into being. Iron Man and the X-Men first appeared in 1963. They may not be ready to retire just yet, but it's a good time for them to take a look at the online Retirement Estimamost popular superhero, and also tor, where they can get an instant, said, "through the After School each group is led by three to four the oldest to hit the screen in re- personalized estimate of future Science Program, the elementary teacher candidates supervised by a of it, if the Hulk or any of the X-Men ever get severely injured, they may qualify for disability benefits through Social Security. Pumpkin seeds are considered nutrient-dense. They contain protein, zinc, iron, potassium, calcium, vitamins A & C and many other vital nutrients.

So, how do you avoid turning a healthy snack into a horror show of fat and sodium? Cut out the butter and the salt. Instead of melted butter, use olive, canola, peanut, sunflower, soybean or corn oil. These oils are high in polyunsaturated fat and monounsaturated fat, which help lower your LDL, or "bad" cholesterol. When you are roasting the seeds, grease your pan or baking sheet using low-fat, low-calorie cooking spray.

Many recipes call for at least a teaspoon of salt. A single teaspoon of salt contains 2300mg of sodium. The American Heart Association recommends you only get 1500mg of sodium per day. Some recipes call for Worcestershire sauce, which adds even more sodium. When you're grocery shopping, make sure you look for reduced sodium Worcestershire sauce.

Also, try other spices instead of salt for your roasted pumpkin seeds. Garlic and onion powder can add a lot of flavor. Cinnamon and pumpkin pie spice work for people with more of a sweet tooth. If you like things on the spicy

We want your local news: e-mail to colby.editor @ nwkansas.com

Polyunsaturated Fat: Sunflower, Soybean or Corn Oil

If your recipe calls for it, use "reduced-sodium" Worcestershire or Hot Sauce

Add a little lemon juice for some extra zing.

Place seeds in one layer on a greased baking sheet or cooking pan.

Coat pans and baking sheets with low-fat, low-calorie cooking spray.

Sprinkle seasonings (usually between 1 1/2 and 4 teaspoons, to taste) on pumpkin seeds.

Use other seasonings instead of salt.

For sweet seeds use cinnamon or pumpkin pie spice.

For spicier seeds use: garlic (not garlic salt), onion powder (not onion salt), pepper, dry mustard, paprika, ground cumin, cayenne pepper, chili powder (watch the sodium and saturated fat) or reduced-sodium taco seasoning (watch the sodium)

Roast on the top rack of the oven at 250° for 45-50 minutes, stirring every 15 minutes, or microwave pumpkin seeds for 2-3 minutes, stirring after each minute.

Allow roasted seeds to cool about 15 minutes before serving. Remember, a serving is one small handful.

Make sure you store leftover roasted pumpkin seeds in an airtight container.

## Free bridge, assembly required

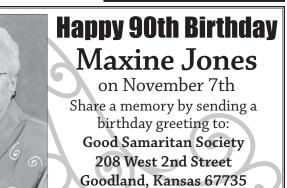

FRANKFORT, Ky. (AP) - Ken- nal form and maintain it. tucky transportation officials are offering a bridge to any taker who will preserve it.

The three-span steel truss bridge over the Kentucky River in the state's southeastern corner would be free and is available after a new bridge is completed next year to carry Ky. 80.

The Lexington Herald-Leader reports that the Kentucky Transportation Cabinet would even pay for taking down the 82-year-old, 456-foot bridge and hauling it to the new owner's location.

The catch is that whoever takes it has to set it back up in its origi-
