Welcoming new agency

KATHRYN BALLARD/Colby Free Press Shirley Skolout had an open house for the Mountain Plains Agency for Nationwide Insurance, a new business in town. Several guests at the grand opening Friday visited together shortly after the ribbon cutting ceremony.

Reunion in Rexford celebrates 80th birthday

We had a reunion at Shepherd's Staff a week ago; Gary Baumfalk and Sherry McDonald held it for their mother Nanette Baumfalk's 80th birthday.

About 40 people attended, including her twin brother, and other siblings, grandchildren, and even one great-granddaughter. They came from Australia, Alaska the Bahamas, and several other states. Nanette Baumfalk and one of her sons arrived in a vintage Ford, surprising her with the gathering.

served for her birthday on Satur- one.

day evening, followed by dinner and breakfast in the ranch house on Sunday morning.

They filled the hotel and had a wonderful time. We were thrilled to get to know them all during their stay. It is so fun seeing families get together from all over the Cupcakes and punch were U.S. for special times such as this

Time to review garden's good, bad

Let me see now. It's the third week of October, and time for me to sit down for a couple of hours and review what happened out in my garden last summer.

I mean, really concentrate on the good things and the bad things that took place out there before the holidays and snow and other distractions cause me to forget about what I need to remember. I make notes about what I should have done as well as the good things that happened, and it helps me to get on the right road come next spring.

So, let me share with you some of my successes and failures of the past summer.

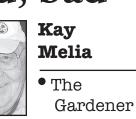

For the second straight year, my green beans quit on me. Can you imagine anybody having problems with green beans, normally one of the most prolific crops in the garden? For now, I will blame it on my choice of variety. I planted a European favorite of filet bean, when I should have stayed with the tried-and-true varieties such as Derby or Blue Lake 274. No more filet beans for me.

The peas weren't much better. I planted my usual favorite variety called Maestro, but failed to get a decent stand. Peas are like that sometimes, and convincing them to germinate can be difficult, depending on soil temperature and early growing conditions. I probably won't plant any next year and use their space for something else.

The cantaloupes failed to live up to expectations this summer. We had many to enjoy, but they never attained the size expected from an Ambrosia melon.

Yes, there were a number of "gardener pleasers" out there this year, so please allow me talk about about five of the most pleasant successes.

1. My star performer this year was cabbage, the Megaton variety. I set out 16 home-grown plants on April 18, and harvested enough cabbage for son Marty and I to

make eight gallons of that wonderful crunchy homemade goodness. (I actually find a few folks who do not care for sauerkraut, homemade or otherwise. Can you imagine?)

A couple of heads weighed over 12 pounds, and there were several heads utilized for slaw and cooked cabbage.

2. I plant both slicing and pickling varieties of cucumbers, but it was the picklers that performed so well this summer. I plant the Burpee Pickler variety and production every year has been sensational. There are 62 pints of three or four different kinds of pickles on the shelf to prove it.

3. While not the best crop of tomatoes I've ever had, my tomatoes performed exceptionally well, particularly early in the season. The Super Tasty variety stole the show, with Northern Exposure and Shady Lady not far behind. I credit any tomato success I have to starting my own plants from seed, which gives me the choice of some of the superior varieties. Early planting in the garden also greatly improves overall yield.

4 and 5. I was blessed with another outstanding onion crop this year with good size and early maturity. The Candy variety (yellow) and the Sierra Blanca variety (white) stole the show. And finally, my early season spinach crop was excellent. I plant the Melody variety each year, and it has never failed me yet.

And now I must work hard to prepare next year's seed bed by adding gobs of leaves and other organic materials and plowing them deeply into the soil before winter comes calling.

Deaths
