#### Wichita becomes discount test market

WICHITA (AP) — The opening of two ShopKo stores here could do more than just save area consumers a few dollars, an expert on discount retailing said.

It could also provide a picture of what happens when an upstart challenges the discount trio of Wal-Mart, Kmart and Target, said Thomas Jensen of the University of Arkansas.

"Wichita may become a very good test market. It will be a good market to watch to see how they do in that kind of face-to-face competition," said Jensen chairman of the university's department of marketing and transportation.

Another topic for the wrap-up session is overhauling the higher education governing system. The conference committee meets on Tuesday, with discussion likely to focus on whether to

A key difference is that the House bill provided extra money to community colleges and Washburn University of Topeka, while the Senate didn't include any money. Another unresolved issue certain to

occupy some lawmakers' time is abortion. The House passed a bill to tighten the late-term abortion law enacted last year. But, again, there's controversy.

The House version lacks an exception for the woman's mental health, which Graves and the Senate says is needed to make it constitutional. Without it, the Senate won't pass it, Bond said.
