## today in history

**July 13, 1901** — The hot weather has nearly exhausted the force in the Rock Island dispatcher's office. Dispatcher Smith evidently is not suffering much from the heat as he was found working at his desk dressed in a shirt waist and a pleasant smile upon his countenance. # More hepatitis cases found in Reno county

HUTCHINSON (AP) — Health officials in Reno County have confirmed three new case of hepatitis A, the latest an outbreak that began in November.

A man 35 to 44 and two men over 45 were diagnosed this week, said Sandra Butler, of the Reno County Health Department.

The recent diagnoses bring to 47 the number of confirmed cases in the area since November.

Hepatitis A is transmitted by the oral-fecal route, passed on by people who use the bathroom and fail to wash their hands. Symptoms include jaundice, fatigue, abdominal pain, loss of appetite, nausea, dark urine, diarrhea and fever.

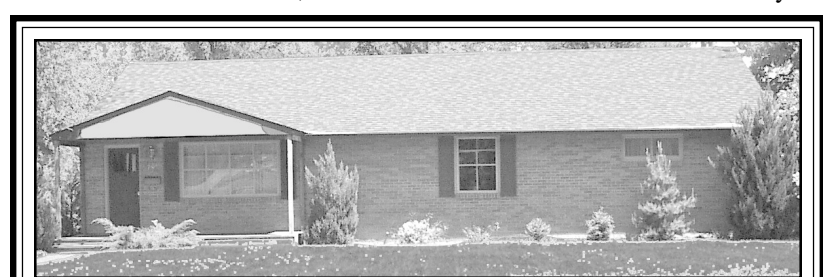

"It could be stopped with good hand washing," Butler said. "We're still trying to teach people."

The source of the outbreak still

eludes health officials, but there are links between cases, said Reno County health nurse Lori Francis, who has

studied all the cases.

Sedgwick had two cases of its 11 that can be linked to Reno County.
