Graves to head trucking industry group job after term

TOPEKA (AP) - Gov. Bill Graves plans to become the leader of a national trucking industry group after leaving office and says his new job security has energized him for next year's legislative session.

Graves announced today he will become the chief executive officer of the American Trucking Associations when his current term ends in January 2003. The group made its own announcement during its national convention in Nashville.

He said he doesn't plan to start briefings for the industry job for another year and won't sign a contract with the trucking association until after he leaves office, so that he won't be distracted from his duties as governor.

Graves said the only downside to the new job will be the need to leave Kansas. The group has offices in Virginia and Washington.

"I couldn't be a happier person," he told reporters during a news conference. "I couldn't be more energized."

Mary Turkington, former executive director of the Kansas Motor Carriers Association made the announcement on behalf of the trucking association in Topeka.

"Governor Graves brings our industry a person with a background in the trucking industry, a man of integrity and respect and with proven leadership qualities," Turkington said.

Graves ended speculation about his future during a Statehouse news conference. He said he never had any notion to not see his eight-year term to its conclusion.

that time."

State Treasurer Tim Shallenburger on Monday told reporters he had heard Graves would take a job with a national trucking organization. Shallenburger is running for the Republican gubernatorial nomination and has suggested Graves would leave office before his term ends in January 2003 to boost a family's trucking company, which his run by Lt. Gov. Gary Sherrer.

Asked if his future job creates a conflict of interest on policy matters, Graves said: "It's not like this is a new revelation, these are people I've had a relationship with for a lot of years."

Graves, 48, grew up as the heir to the father built to the largest in Kansas.

"It's fair to say my family is very and uncles began working in the industry in 1935. "It's going to be a little like coming home.'
