Berlin court convicts four in disco bombing

INTERNATIONAL

BERLIN (AP) — A Berlin court convicted four people Tuesday in the 1986 bombing of a West Berlin disco that killed two U.S. soldiers and a Turkish woman. The United States blamed the attack on Libyan leader Moammar Gadhafi — a charge the court said was not proven.

The court said the bombing was planned by members of the Libyan secret service and workers at the Libyan Embassy in then-East Berlin. But Judge Peter Marhofer said prosecutors failed to prove that Gadhafi himself ordered the attack, due to the refusal of the German and U.S. secret services to provide evidence.

Marhofer said "the limited willingness" of the German and U.S. governments to share additional intelligence was one of the disappointments of the trial.

The court said all four defendants plotted the attack, but it found only Verena Channa, a 42-year-old German, guilty of murder. She was sentenced to 14 years in prison.

Yassir Chraidi, a 42-year-old Palestinian accused of being the main organizer, was convicted of multiple counts of attempted murder, as were Musbah Abdulghasem Eter, a 44-year-old Libyan, and a Lebanese-born German, Ali Chanaa, 42. Chraidi was sentenced to 14 years; Eter and Ali Chanaa to 12 Culbertson, floating nearby, made sure

Chanaa's sister, Andrea Haeusler, 36, close to the space station. was acquitted.

CAPE CANAVERAL, Fla. (AP)-ARussian cosmonaut and an American astronaut completed a spacewalk outside the international space station, hooking up cables, testing a crane and doing a little sightseeing in the process.

"Whoa, look beneath us now. Can you see those lights?" station commander Frank Culbertson said to his they have been used exclusively to spacewalking partner, Vladimir Dezhurov, as the station headed over the Arabian Sea. "Incredible."

During the five-hour excursion Monday, the spacewalkers routed seven antenna cables for the Russian could be a long-term solution for docking system. The men also inspected and photographed a Russian solar wing that never fully deployed. All the screws and bolts appeared to be in place on the stuck panel.

Because the cosmonauts did not short supply. have time to test the crane they installed on their first spacewalk, the hand-intensive job fell to Culbertson and Dezhurov.

Using a hand crank, Dezhurov extended the telescoping crane out to almost its full length of 40 feet.

years each. A fifth defendant, Verana the end of the crane didn't get too

ANAHEIM, Calif. (AP) — Pumps that boost weakly beating hearts can be implanted permanently in the terminally ill, offering an alternative to heart transplants that could save tens of thousands of lives annually, according to a landmark study.

These so-called assist devices have been available for several years, but keep patients alive while they wait for heart transplants. Now the much-anticipated new study, released Monday, suggests a far broader use.

It concludes the assist devices many of the estimated 100,000 Americans each year with congestive heart failure who could benefit from transplanted hearts but cannot get them because the organs are in such

Doctors tested the HeartMate, the most widely used assist device, in patients with severe heart failure. They found it doubled survival after one year and tripled it after two years, even though complications such as infections and mechanical breakdowns were a significant problem.

"We are looking for a heart on a live our presidencies." shelf, and this study was designed to validate that," said Dr. Eric A. Rose of Columbia University, the study's director. "There is substantial hope for patients with the most severe form of heart failure, and I think this will be available for them soon.'

WASHINGTON

weapons stockpiles are due to be slashed at summit talks President Bush is holding with Russian President Vladimir Putin, both leaders having concluded they have far too many deadly warheads in the post-Cold War era.

If any suspense remained before Putin called at the White House it was whether the cutbacks would be mandated in an agreement between the two leaders or be declared by them without a formal accord of the type Bush's advisers scorn as products of outdated bureaucratic haggling of a now-distant era.

The summit talks Tuesday in Washington and Wednesday and Thursday at Bush's Texas ranch are more likely to be marked by atmospherics designed to inform the world that the United States and Russia no longer are adversaries.

Bush told Russian reporters on Monday that he and Putin were on the verge

WASHINGTON (AP) — Doctors who recognized the recent cases of inhaled anthrax and treated them aggressively with antibiotics have shown the disease is treatable and not a sure death sentence, experts say.

An analysis of the cases, published WASHINGTON (AP) — Nuclear in the Journal of the American Medical Association, shows that if doctors speedily give patients a constellation of antibiotics, along with aggressively treating symptoms such as the accumulation of fluid in the chest, there is a high rate of survival. The cases appeared in four eastern U.S. cities in the past few weeks.

"The fact that six of these patients have survived gives hope that the published mortality rates of 86 to 97 percent for inhalational anthrax may not be accurate in the year 2001," Dr. Anthony S. Fauci and Dr. H. Clifford Lane, both of the National Institute of Allergy and Infectious Disease, said in a JAMA editorial last week.

The rate of survival — 60 percent for the recent inhalational cases --- could well improve for future infections because doctors across the country now are so aware of anthrax and its symptoms.

"The signs and symptoms of inhalational anthrax are way up on the radar of forging a relationship that "will out- screen of virtually all health care pro- three-year term.

viders now," Fauci, the NIAID director, said in an interview.

WASHINGTON (AP) - Bishop Wilton Gregory is in line to become the first black president of the group that serves as the collective voice of the nation's Roman Catholic bishops.

The Belleville, Ill., bishop now serves as the vice president of the U.S. Conference of Catholic Bishops. The organization's vice president traditionally ascends to the top office.

Black Catholics see Gregory's expected election Tuesday as recognition they have long sought from church leaders. Estimates of the number of black Catholics range from 2 million to 3.5 million, out of 63.7 million church members nationwide.

"It's a symbol of pride," said Richard Mark, who is black and the chief executive of St. Mary's Hospital in Gregory's diocese. "He shows that with intelligence, education and hard work, you can rise to the top ranks in whatever field you go into."

Gregory is known as a compelling speaker who frankly discusses racism as a sin he feels the church should do more to address. He has also written extensively on the church's opposition to the death penalty and physician-assisted suicide.

The current president is ending his

By Carl Manning

Associated Press Writer LAWRENCE—Turkmenistan will play some role in shaping the post-Taliban future of neighboring Afghanistan, the former U.S. ambassador to the Turkmen government said.

But the role of Turkmenistan and the shape of the post-Taliban world remains to be seen, Ambassador Steven Mann said Monday.

"By virtue of their geography they are going to be playing a significant role in encouraging an Afghan settlement," Mann said.

"Beyond that, I think the situation is so fluid, no one can say who will have which role," Mann told reporters at the University of Kansas, where he delivered a lecture.

Mann said Turkmenistan, which shares a 600-mile border with Afghanistan, has worked with the United Nations and on its own to attempt an agreement between the Taliban and northern alliance.

can't fault the Turkmen or anyone because they were not successful in bringing the sides together in productive talks," he said.

Turkmenistan to play role in area

Turkmenistan is a member of the "Six-plus-Two" committee that includes the United States, Russia and six Afghan neighbors — Iran, China, Pakistan, Tajikistan and Uzbekistan. It has tried for years to end war in Afghanistan.

Its members on Monday pledged "to establish a broad-based Afghan administration on an urgent basis."

Mann said Turkmen President Saparmurat Niyazov "certainly is no friend of terrorism." "My sense is the Turkmen have been

sympathetic and generally supportive of the U.S. view in this war on terrorism," Mann added.

Turkmenistan has pursed a policy of neutrality, but Niyazov agreed to allow U.S. planes to use Turkmen airspace for humanitarian flights in connection
