Brewster water quality improves with water well back in service

By Jan Katz Ackerman

Colby Free Press Brewster residents have safe drinking water and more water, now that one of three wells has been put back in service.

"We are advising people that the nitrates in Brewster's city water well No. 4 are now at 5.0 milligram per liter," said City Superintendent Mike Schultz. "Well No. 2 has also maintained safe levels.'

In February, Schultz notified Brewster residents they should not give city water to infants 6 months or younger or use the water to make infant formula. Nitrates can deplete oxygen in infants, causing blue baby syndrome.

Nitrates in drinking water can come from natural causes, industrial or agricultural sources, including septic systems and agricultural run off, state officials say. Levels of nitrate in drinking water can vary throughout the year, and Schultz, said in March that well No. 4 would remain out of service until the nitrate level dropped.

The wells are below the maximum contaminant level of 10.0 milligrams per liter of water, the limit allowed for use by the federal Safe Drinking Water act of 1974, he said. Brewster's water is tested for nitrates four times a year under state

"Once again, we want to explain that nitrates turn into nitrites in the sume nitrate from food rather than body and these inorganic chemicals from water, he said. can be weather related, seasonal and

No. 3 is about 50 feet away.-

Colby seeking Colorado man

Colby police are asking people to look out for a man wanted for questioning in the murder of a 23-yearold Las Animas, Colo., woman.

Henry Isom, 31, of Las Animas, is wanted by the

police in the Colorado town, said Gary Shull, Colby police detective, but it's possible that he may have been in Colby or could be coming there since he has a relative living in Colby.

"Isom could be driving a gold Kawasaki motorcycle with Colorado plates 058-HLT," Las Animas police said, describing the fugitive as a black, Hispanic male, 5-6, 152 pounds, with very short buzz-cut hair.

The body of Chasity Ann Stine, a mother of three, was discovered April 2, an official with the Las Animas police said. Isom is an exboyfriend and the father of her children

"Stine was last seen on Saturday, March 30, getting ready for a date," a family member told police. "When we tried to call her, she didn't answer."

Family and friends looked for her for days. Her body was discovered wrapped in a quilt in a field in Bent County, Colo.

A restraining order against Isom was granted two weeks prior to Stine's disappearance.

Shull encourages anyone with information to call the Colby Police at 462-4460 or the Las Animas Police, (719) 456-1363.
