

**EDUCATION:**

Super-fast LTE technology will connect Kansas students to a world of interactive learning.

## Expanding our LTE mobile broadband network across more of Kansas.

**PUBLIC SAFETY:**  
LTE will provide a more advanced wireless network for Kansas first responders.

**ECONOMY:**  
Expanding high-speed wireless Internet across Kansas will create jobs, fuel economic growth, and spur innovation.

**HEALTHCARE:**  
LTE will connect Kansas families to doctors and specialists across the state and around the world.

Mobile broadband is taking another major step forward.

The network technology is called LTE (Long Term Evolution), and it's more than just another update. It's a whole new way to get online — a super-fast wireless connection to the Internet.

The planned combination of AT&T and T-Mobile will allow us to expand our advanced network to cover an additional 50,000 square miles in Kansas — delivering a new choice for broadband Internet access.

Our customers will get a stronger network. Kansas will get cutting-edge wireless technology. And 750,000 more Kansas residents will get a new choice for mobile broadband and all the benefits it brings.

**We can't wait to see what you do with it.**
