Chef's three easy steps to a juicy turkey

Brining is the technique of soaking your turkey in a salt water solution. It's plain and simple: salt causes the meat tissues to absorb water and flavorings as it breaks down the proteins, resulting in the most flavorful, juicy turkey you've ever experienced. (And what could be better than that on Turkey Day?) No matter your method of cooking (roasting, deep frying, smoking, grilling, etc) a brined bird is truly the way to go.

Step 1: Prepare the brine Here's my recipe – it's my rendition of an older Alton Brown

water, 1 cup dark brown sugar, 1 prepared brine. Tbs. peppercorns, 5-6 sprigs fresh rosemary, 10-12 smashed garlic the brine cloves – combine all and stir until

ange juice concentrate, 1 quart hot Add 3 quarts cold water to cool the

Step 2: Submerge Your turkey in

well as extract dif-

fit in your refrigerator, which is changes to subsequent birds.) sometimes not an easy task! • Pour the prepared brine mixture

- into a large, clean, cooler. Submerge bird (rinsed and all giblets, neck, etc. removed from cavity, 16-18 lbs.) breast-side-down in brine. If bird is not fully immersed, add more liquid (broth or water) until nearly covered
- Fill a couple of gallon bags with ice and place these on top of bird to keep submerged in brine.
- Close the cooler lid and let bird Using a cooler to brine your bird brine (soak) for 8-10 hours. (Exact rack of preheated 500 degree F.

Making a sketch of garden helps with crop rotation

As we end the growing season for gardens think about what worked and did not work in the garden.

Make a few notes for next year. While you are jotting down your thoughts of what variety of tomato you want to get again next year or what not to get, why not make a sketch of your garden so the layout is not forgotten when it is time to plant next year?

Why would you want a sketch of the garden? So you have a planting guide for next year to plan for crop

It is important to rotate crops even in a small garden. Rotating

vegetable crops is a standard way of helping prevent disease from being carried over from one year to the next. Rotation means crops are moved to different areas of the
