College closes due to health issue

Northwest Kansas Technical College closed its campus on Thursday after several reported cases of scabies.

The college posted a notice on its website Thursday morning, saying that due to public health concerns, the campus would be closing until Tuesday. Faculty and staff will be returning Monday.

Sherman County Emergency Management posted a more detailed release at noon Thursday, saying a student had reported a case of scabies to the Northwest Tech administration on Tuesday afternoon. Additional cases were reported on Wednesday.

Northwest Tech's administration met with the Sherman County Health Department to

"develop a plan of action to address the scabies concern and prevent further cases."

Additional resources from the Goodland Family Health Center, Sherman County Emergency Medical Services and Sherman County Emergency Management were brought in to help check all students, faculty and staff for scabies Thursday in clinic set up in the Medical Assistant building on campus. The Health Department closed its office Thursday to help perform the checks.

In the release, Donna Terry, health department administrator, said scabies is a contagious skin rash caused by a parasite, the human itch mite.

"Scabies is not a result of being unclean,

everyone is equally susceptible," Terry said, "Center for Disease Control does not consider scabies as a reportable disease."

The life span of scabies mites is 48 to 72 hours without a human host. The release said treating those with scabies as soon as possible and closing the college for four days should prevent the mites from spreading further.

Patients can obtain treatment at either the County Health Department or the Goodland Family Health Center; however fees and financial responsibility will differ at each facility.

The release said symptoms can include a rash area with dry or flaking edges, which might first appear as a small blister along with

extreme itching. Typically symptoms will occur one week after exposure; however may not appear for up to 21 days. Symptoms may occur between fingers, at wrist, elbow and shoulders, between shoulder blades, around breasts, at waistline and in genital areas, at knees, ankles and feet.

Treatment is a prescription cream that is applied from head to toe after showering, left on for eight to 14 hours and then rinsed off. All clothing, bedding and other cloth surfaces such as mattresses and seats should be washed and dried at hot temperatures or vacuumed. Hard surfaces can be wiped cleaned with disinfectant wipes.

Deputies chase stolen car Sunday

By Sam Dieter
sdieter@nwkans.com

A St. Francis man driving a car, allegedly stolen Sunday in Atwood, led sheriff's deputies on a chase through Sherman and Wallace counties before taking off through pastures and wrecking the car north of Sharon Springs just before 3 p.m.

When he lost control of the 2008 Dodge Charger on County Road R, the Kansas Highway Patrol reported, the car stopped more than 800 feet off roadway. The driver was taken to the Goodland Regional Medical center for treatment.

The driver, Floyd Clifford Coates Jr., 35, was spotted driving on old U.S. 24 in Sherman County near the Thomas County line west of Brewster, said Sherman County Sheriff Burton Pianalto. He was driving a 2008 Dodge Charger matching the description of a car that had been reported stolen in Atwood.

"The individual took off through the county, kind of zig-zagged through the county and into Wallace County," Pianalto said.

Doug Whitson, the part-time Sherman County sheriff's deputy who spotted the vehicle, was joined by Scott Baker of the Kansas Highway Patrol as he chased Coates into

Wallace County, Pianalto said. He added that Sherman and Wallace County deputies and more state troopers joined the chase. They finally cornered the vehicle on Wallace County Road S, east of K-27 highway.

"He took off cross country through a wheat field and through a ditch," Pianalto said, adding that the driver continued across County Road R, which is not a maintained road, before he wrecked.

The report said the car finally came to a stop 800 feet south of the road, almost a half mile east of K-27 and about 4.2 miles north of Sharon Springs, at 2:58 p.m.

Coates was booked into the Sherman County Jail the same day and booked for driving under the influence, transporting an open container, driving with a suspended license, possession of methamphetamine, possession of stolen property, reckless driving and parole violation.

Pianalto said Monday afternoon that he was still there, and that the Sherman, Wallace and Rawlins county attorneys will work together on charges in the case.

Atwood Police Chief Brad Withington confirmed the charcoal 2008 Dodge Charger had been stolen there.

Thunderstorms move through area

By Kevin Bottrell
kbottrell@nwkans.com

A stormy Monday that saw several tornado chasers pass by Goodland, ended up with little in the way of severe weather for Sherman County, but a wild day elsewhere in the tri-state area.

One severe storm formed west of Burlington and moved northeast, cutting the northwest corner of Sherman County, dropping rain and hail up to 2 inches in diameter. The storm worsened as it moved northeast, resulting in at least two tornadoes. One ripped through a feedyard and farm about three miles east of Benkelman, Neb., at 7:45 p.m. It destroyed buildings, grain bins, vehicles, trees and power poles. No injuries were reported but several cattle had to be put down.

Another tornado was spotted in

School board talks bleachers, playground

By Pat Schiefen
The Goodland Star-News

The Goodland School District is going to be a busy place this spring and summer with a new playground going in at West Elementary, new bleachers on the north side of the Max Jones Fieldhouse as well as starting renovation work on West and North Elementaries.

The school board voted to replace the bleachers on the north side of Max Jones Fieldhouse this summer. They will have backs on them. The bid from Irwin Seating Company was for \$217,409. The south side will cost \$133,430 and the district hopes to install that in the summer

of 2014. The bid did not include removal and disposal of the current bleachers and it was decided the district would do that possibly salvaging some wood and metal.

The district will have to republish its budget for 2012-13 because they got \$127,000 more from the government than they expected. Included in the amount were \$38,000 more for both at risk and special education.

The board interview four candidates for construction manager for the school renovations included in the recently passed school bond.

Goodland native to speak Saturday at the museum

Terry Leonhart, quality assurance dimensional inspection technician at Sierra Nevada Corporation, Space Systems Group, in Louisville, Colo., will speak at the High Plains Museum at 10:30 a.m. Saturday. Leonhart, a Goodland native, will discuss how he got into the "space business" and the future of space flight with the Sierra Nevada Corporation.

Sierra Nevada Corporation is one of America's fastest growing private companies based in the fields of electronics, aerospace, avionics, space, propulsion, micro-satellite, aircraft, communications systems and solar energy. It employs over 2,500 people in 30 locations across 16 states.

Leonhart is the son of the late Everett Leonhart and Laverne and

the late Dick Stegman. He was born and raised in Goodland and graduated from Goodland High School in 1974. He and his wife Mary Kaye Hines live in Milliken, Colo.

In 1978, after attending Barton County Community College, Leonhart began working in the manufacturing industry in Great Bend. He spent 15 years as a machinist for companies like Stanley Aviation, Rockwell International and Ball Aerospace, all based in Colorado.

In 1992, he established his own engineering consulting company, GD&T Consultants, to train manufacturing companies in proper dimensioning and inspection techniques that are applied from engineering drawings. At his sec-

obituaries

Gerald L. "Jerry" Dawson

Gerald L. "Jerry" Dawson, 78, Tampa, Fla., 1953 graduate of Sherman Community High School, died Monday, March 18, 2013, after a 21-year battle with Parkinson's Disease.

He was born March 16, 1935, to Ira and Margery Dawson in Goodland.

Mr. Dawson earned a Bachelor of Science in journalism from the University of Kansas in Lawrence, a Masters of Business Administration from Michigan State University and a masters degree from Northwestern University's Medill School of Journalism.

On March 19, 1960, he and Judy were married in a blizzard in Bismarck, N.D.

He served with the U.S. Navy on active duty for 11 years and in the Naval Reserve for another 15 years. He was commissioned an Ensign in 1957 and served on the aircraft carrier U.S.S. Franklin D. Roosevelt, which sailed from the Brooklyn Navy Yard to Mediterranean ports in Italy, Greece and Spain. Mr. Dawson fought the Vietnam War from Cheatham Annex, Virginia, which was considered foreign shore duty at the time, and from Washington, D.C., where he was assigned to the Naval Ordnance Systems Command, the Special Projects Office and wrote speeches for the Admiral. He was a public affairs officer during the successful test launch of the British Navy's first Polaris nuclear submarine-launched ballistic missile in the mid 1960s off the east coast of Florida. He retired as a Captain. In the private sector he was a public relations director for Hercules Inc., Wilmington, Del., Rock Valley College, Rockford, Ill. and Honeywell Aerospace in Clearwater and Tampa Bay, Fla. In 1975 he was hired by Tampa Electric Co as director of public affairs and remained there for 10 years.

He was on the boards of Judeo

Dawson

Christian Clinic, Seniors in Service, Committee of 100, Leadership Tampa, American Marketing Association Tampa and the Public Relations Society of America. Before retiring in the 1990s he was senior vice president of Investor Relations Consultants in Pinellas County.

Mr. Dawson sang bass in the Tampa Oratorio Society; VocalEase, an ensemble of eight singers, the Lutheran Church of Our Saviour choir and Good Shepherd Lutheran choir.

He loved sailing through storms in the Gulf, cooking, tennis, music, photography and reading.

Preceding him in death were his parents, brother Sylvan Dawson and sister and brother-in-law Beth and Bob Fixsen.

Survivors include his wife of 53 years; two sons, Stuart (Joanie) Dawson of Tampa and Christopher Dawson of Minneola, Fla.; two brothers, David (Karen) Dawson of Boulder, Colo. and Mark (Marla) Dawson of Sioux Falls, S.D.; a sister, Ila (Charles) Little of Placitas, N.M.; a sister-in-law, Mary Ann Dawson of Marion, Iowa; and a grandson.

Services were at 2 p.m. (Mountain Time) on Tuesday, April 2, 2013 at Good Shepherd Lutheran Church, 501 S. Dale Mabry Hwy, Tampa, Fla., with Pastor Thomas Weitzel officiating and inurnment at 9:30 a.m. on Wednesday, April 3, 2013, at Florida National Cemetery, 6502 SW 102nd Ave, Bushnell, Fla.

Memorials may be sent to the American Parkinson Disease Association, Parkinson Plaza, 135 Parkinson Ave., Staten Island, N.Y. 10305.

Blount and Curry Funeral Home - Carrollwood Chapel, 3207 West Bears Avenue, Tampa, Fla.

Cecilia Douglas

Cecilia Douglas, 91, Sharon Springs, grandmother of Tim (Michelle) Douglas of Goodland, died Monday, April 8, 2013, at Greeley County Hospital in Tribune.

She was born on March 1, 1922, to Katie (Bissing) and Adolf Dorzweiler at Catherine in Ellis County. When she was four the family moved to Weskan and she started school there. The family later moved to rural Wallace and she graduated from eighth grade there. In October of 1935 the family moved to Sharon Springs and she graduated from Wallace Community High School in 1939.

On July 21, 1941, she and Harold Edgar "Cupe" Douglas were married at the Holy Ghost Catholic Church in Sharon Springs. Mrs. Douglas worked at various jobs while her husband was in the military, before starting to work at People State Bank in Sharon Springs in September 1952. She retired from the bank after 30 years in 1982. "Cupe" Douglas died on July 13, 1980.

On May 4, 1991, she and Lloyd Keith Camp were married at Holy Ghost Catholic Church in Sharon Springs. He died on Sept. 14, 2011.

She was a member of Holy Ghost Catholic Church and Altar Society, as well as the Veterans of Foreign Wars Auxiliary. Mrs. Douglas enjoyed traveling, visiting casinos,

Douglas

playing cards and dancing. Staying in shape was a priority for her.

Preceding her in death were both of her husbands; her son Donald Douglas; her daughter-in-law Helen Douglas; her parents; four brothers, Fidelis Dorzweiler, Edwin Dorzweiler, Ernest Dorzweiler and Albert Dorzweiler; and three sisters, Johanna Dorzweiler, Alma Bell, Rose Leiker.

Survivors include two other grandchildren, LaDonna Denning of Evans, Colo. and Jeanette (George) Maier of Oakley; three step-daughters, Joy (Alwin) Garst of Potwin, Penny (Steve) Mincks of El Dorado and Melody (Bill) Wallis of Arvada, Colo.; eight step-grandchildren; six great-grandchildren; two step-great-grandchildren; and a great-great-grandson.

Services were at 10:30 a.m. on Thursday, April 11, 2013, at the church in Sharon Springs with Father Norbert Dlabal presiding and burial in the Sharon Springs cemetery.

Visitation was from 3 to 6 p.m. on Wednesday, April 10, 2013, at Koons Funeral Home in Sharon Springs. Vigil was at 7 p.m. at the church.

Memorials to the church may be sent to Koons Funeral Home, 211 N. Main, Goodland, Kan. 67735-1555.

Fred Aldon Russell III

Fred Aldon Russell III, 46, Kanorado resident, died Monday, April 1, 2013, at his home.

He was born on May 28, 1966, to Fred Jr. and Sharon Russell in Pueblo, Colo. The family lived in Texas, Nevada and Colorado as he was growing up. In 1984 he graduated from Indian Springs, Nevada, High School.

Preceding him in death was his

father.

Surviving him is his mother of the home.

A memorial services will be at 2 p.m. on Monday, April 15, 2013, at the park at Lanborn and Oak street in Kanorado.

Memorials to be designated by the family late may be sent to Bateman Funeral Home, Box 278, Goodland, Kan. 67735.

School screening to be next week

The Goodland School District will have its kindergarten registration for all kids who have reached the age of five on or before Aug. 31. It will be from 8 a.m. to 3 p.m. on Wednesday at West Elementary School, 912 West 12th. No appointment is necessary.

Each child will complete placement evaluation in August at the beginning of the school year.

Parents need to bring the child's immunization records, school entry physical, certified copy of birth certificate and copy of social security card.

Music from all genres opens exhibit

By Pat Schiefen
The Goodland Star-News

Talented men of the area performed for the opening of the Northwest Kansas Technical College computer graphics technology program's display of student art on Sunday afternoon at the Carnegie Arts Center.

The men were invited to perform by the Goodland Federated Music Club. Those performing were Dr.

David Younger on the viola; Lloyd Holbrook on the piano; David Branda, a vocal accompanied by Holbrook; Rue Sowers, a vocal accompanied by himself; Josiah Akers of Weskan on the violin accompanied by Mary Beth Akers; Ron Vignery and Jay Jolly on baritones and a barbershop quartet made up of Dean Graber, Jeff Mason, Kelly Beek of Cheyenne Wells, Colo. and Adam Dees.

Music played varied from Chopin, American Folk, Dixieland jazz, Baroque music, barbershop and contemporary music. Holbrook left the piano smokin' after his Chopin and Vignery and Jolly transported listeners to New Orleans. Sowers left the audience wanting to sit on the dock by a bay. Akers and Younger added the serious notes of classical music while Branda and the barbershop quartet added lighter

notes to the program. Graber said the barbershop had recently reformed after the retirement of Mel Pfau from the Barbershop Connection. He also said they have done switching around on who sings what. The computer graphics program at the college is a two-year comprehensive study of graphic design theory and technology. The first year is focused on building problem

solving skills, understanding the elements and principles of visual art and using both to do works in print media. The students have produced projects including book covers, info-graphic posters and illustrations. Second year students focus on digital media in the form of motion graphics and web design. This year student have worked with local businesses and restaurants to de-

velop web sites. All of them will be beginning a four-week internship this April in Kansas, Colorado, Wyoming and California. Heading the program is Goodland native Adam Elliott and Dodge City native Ian Tompkins. Both are graduates of Fort Hays State University with a Bachelor of Fine Arts. This exhibit will continue to be on display until Sunday, April 28. The center is located at 120 W. 12th.

Couple to observe 60th

The children of Marion and Coleen Crumrine are having card shower in celebration of the couple's 60th wedding anniversary on Sunday, April 14, 2013.

The couple were married on April 14, 1953, at the United Methodist

Church in Brewster. The ceremony took place while Marion Crumrine was on leave from the Army. Following the wedding, he served overseas in the Korean Conflict.

Their children include Carlene (Joe) Moore of Lakin, Carolyn

(Brian) Somers and Willard (Marla) Crumrine of Brewster. They have six grandchildren and seven great-grandchildren.

Cards may be sent to them at Box 134, Brewster, Kan. 67732.

Carbon dioxide levels may be helpful to wheat

Plenty has been written about concerns over elevated levels of carbon dioxide in the earth's atmosphere, but a Kansas State University researcher has found an upside to the higher CO2 levels. And it's been particularly relevant in light of drought that overspread the area in recent months.

"Our experiments have shown that the elevated carbon dioxide that we now have is mitigating the effect that drought has on winter wheat and sorghum and allowing more efficient use of water," said Kansas State agronomy professor Mary Beth Kirkham.

Kirkham, who has written a book on the subject, "elevated Carbon Dioxide: Impacts on Soil and Plant Water Relations," used data going back to 1958. That's when the first accurate measurements of atmospheric carbon dioxide were made, she said.

"Between 1958 and 2011 (the last year for which scientists have complete data), the carbon dioxide concentration has increased from 316 parts per million to 390 ppm," she said. "Our experiments showed that higher carbon dioxide compensated for reductions in growth of

winter wheat due to drought. Wheat that grew under elevated carbon dioxide (2.4 times ambient) and drought yielded as well as wheat that grew under the ambient level carbon dioxide and well-watered conditions."

The research showed that sorghum and winter wheat used water more efficiently as a result of the increased levels of carbon dioxide in the atmosphere, Kirkham said. Because elevated carbon dioxide closes stomata (pores on the leaves through which water escapes), less water is used when carbon dioxide levels are elevated. Evapotranspiration is decreased.

Studies done subsequent to the early work confirmed the findings.

Over the past few months, the researcher said she's heard people comparing the dry summer of 2012 with the Dust Bowl years of the 1930s and the drought of the mid-1950s in Kansas.

The first accurate measurements of CO2 levels were made in 1958, so while scientists do not know what the concentration of CO2 was in the 1930s, Kirkham said, she used the data that she and her students collected to calculate how much the

water use efficiency of sorghum has increased since 1958, which was about the time of the middle of 1950s drought.

"Due to the increased carbon dioxide concentration is the atmosphere, it now takes 55 milliliters less water to produce a gram of sorghum grain that it did in 1958," she said. "Fifty-five milliliters is equal to about one-fourth of a cup of water. This may not seem like a lot of water savings, but spread over the large acreage of sorghum grown in Kansas, the more efficient use of water now compared to 1958 should have a large impact."

"The elevated carbon dioxide in the atmosphere in 2012 ameliorated the drought compared to the drought that occurred in the mid-1950s."

At the basis of Kirkham's book are experiments that she and other researchers conducted in the Evapotranspiration Laboratory at Kansas State University from 1984 to 1991.

"They were the first experiments done in the field in a semi-arid region with elevated carbon dioxide," Kirkham said. The lab no longer exists, but the work continues.

corrections

In the front page story of "Volunteers pack food for needy" on Tuesday, April 9, the large group of student came from Sharon Springs instead of Weskan. This was due to reporter error.

"Western Hospitality"

from other viewpoints...

Medicaid expansion will cost us billions

Leaders in Topeka are considering whether to expand the Kansas' Medicaid program now that the Affordable Care Act has been ruled at least partly constitutional by the U.S. Supreme Court.

In doing so, they are presented with cost estimates from sources across the state and the country. Kansas Policy Institute's estimate from 2011 said that the "Mandate Effect" of the law would cost the state \$4.1 billion over 10 years, while an expansion of Medicaid eligibility would cost an additional \$625 million. That analysis was written before Medicaid expansion was a choice and a continuation of that analysis was released today by the same author at the institute.

Dr. Jagadeesh Gokhale, a sitting member of the Social Security Advisory Board and a former senior economist at the Federal Reserve Bank of Cleveland, disaggregates his earlier analysis in today's "Should Kansas Expand Medicaid Under the Affordable Care Act?"

"Our projections of Kansas' Medicaid cost growth under the ACA suggests that other entities' cost estimates are implausibly low," Gokhale writes. "The ACA is very likely to increase health care costs and health insurance premiums. At best, it will push state health spending to unsustainable levels. At worst, it could cause total chaos because, knowing that they cannot be denied coverage despite preexisting conditions, people could very likely choose to pay the ACA's "tax" instead of sky-high health insurance premiums – until they actually need insurance and health care services."

Gokhale's analysis is within the range of other estimates for the number of enrollees poised to join the Kansas Medicaid rolls for both the Mandate Effect and the Expansion Effect. The Mandate Effect would account for those individuals currently eligible for Medicaid who could be compelled to join the program under the ACA's individual mandate. KPI's Mandate Effect projection was 102,000 Kansans, well within that 30,000-162,000 range set by two separate studies from the Kansas Health Institute.

Where KPI's estimate does differ is in the costs associated with these new enrollees. Gokhale identified 45 different enrollee categories, per gender, and utilized historical trends to determine the different costs associated with each different enrollee category (a sample of these categories is here). These cost projections were then appropriately weighted by the trend-determined shares of future enrollees by demographic (gender/age/income/health) type.

Institute President Dave Trabert said, "If Kansas chooses to spend \$625 million on Medicaid expansion, on top of the \$4.1 billion we're projected to spend under the ACA, we have to ask where that money is going to come from? And what happens when the federal government finally admits it has to cut spending and can't afford to cover most of the cost?"

"Medicaid's share of general funding revenue increased from 3.7 percent to 17.8 percent between 1998 and 2012 and will reach 31 percent by 2023 with the implementation of ObamaCare and Medicaid expansion. The crowd-out effect that has already occurred on education and other services will only get much worse unless other steps are taken.

"Kansas needs health-care reform, but the answer is less, not more government intervention. Health care can be made more affordable and accessible by removing restrictions on group formation allowing people to purchase the coverage they want instead of mandate-heavy policies, allowing insurance to be purchased across state lines and other consumer-focused reforms." —James Franko, the Kansas Policy Institute

California agriculture is mind-blowing

Huge and nearly impossible to comprehend are words that best describe the economic impact of California agriculture as viewed through the eyes of nine Kansas farm families who toured the state beginning March 25.

Each year, families from each Farm Bureau district in Kansas tour California farms as Farm Family of the Year designees. This year, the Kansans touched down in Los Angeles. The state's 81,500 farms and ranches received a record \$43.5 billion for their output last year.

California's agricultural abundance includes more than 400 commodities. The state produces nearly half of U.S.-grown fruits, nuts and vegetables. Across the nation, U.S. consumers regularly purchase several crops produced solely in California.

An avocado and lemon ranch in Ventura County was the first stop on this year's Farm Family trip. Leaven Fairview Ranch is owned by David Schwabauer. Located in Ventura County along the Pacific Coast, Schwabauer is neighbors with nearly 900,000 people in just this county. The top five crops include strawberries, raspberries, lemons, celery and tomatoes.

In addition to the ever-encroaching urban sprawl, the biggest challenges Schwabauer faces are pests and diseases that threaten his avocado and lemon crops, including the citrus psyllid and the boring beetle.

Applying enough water during the critical growing season and finding enough labor to harvest crops is another challenge. Schwabauer and other produce growers often cannot find enough help to harvest fruits and vegetables.

Lemons imported from Chile and Mexico are flooding into southern California, oversupplying the market and causing the price to tank for U.S. growers.

Phil McGrath has carved out an "organic"

Insight this week

• john schlageck

niche in Camarillo, several miles north of Leaven Fairview Ranch. The McGrath family farm takes pride in supplying its customers with the freshest organic fruits and vegetables, he said. Their products are picked the same day as delivered with a guarantee that nothing is more than 24 hours old.

A few years ago, McGrath said, he couldn't sell his fruits and vegetables because most of his Ventura County customers were looking to buy organic.

"They directed me to organic farming," he says. "My goal is to grow as many things as possible in their season."

The McGrath family farm grows everything from strawberries and baby vegetables to legumes and flowers. These are not only attractive to their customers but work well with sustainable growing methods of crop diversity and rotation.

Pyramid Flowers, on the southern California coast near Oxnard, offers premium quality, specialty-cut flowers for the wholesale and mass markets. Seventy percent of these flowers wind up in supermarkets, including those in Kansas.

Owner Fred Van Wingerden opened his 50 acres of fertile fields and 20 acres of greenhouses to the Kansas visitors. A first-generation grower from the Netherlands, Van Wingerden began his flower business in 1979.

For Van Wingerden, harvesting his flowers when they reach maturity is critical.

"You have one day to harvest them at that

point," he says. "One day later, and the plants suffer and so does my business."

The trend at Pyramid Flowers has been to steer away from chemical pest control. Cost of chemicals like methyl bromide has rocketed out of sight, so Van Wingerden uses steam sterilization to control weeds.

Another fascinating stop on the California trip included Associates Insectary. This cooperative provides its fruit and vegetable growing members with pest control advice and beneficial bugs. This sustainable farming program began in the 1920s when citrus mealy bug infestations threatened to wipe out the industry in and around Santa Paula.

Associates Insectary was established by farmers to help fight this pest by raising and releasing millions of mealy bug destroyer beetles in their groves. An average of 800 million beneficial organisms are raised 365 days each year. They are released in the 8,500 acres of groves that are members of this cooperative throughout the year.

One other farm stop was Kallisto Greenhouses. Located in Fontana, this family-owned business was established in 1976 on a 10-acre parcel with 257,000 square feet of covered greenhouses. Kallisto sells tropical foliage plants for use indoors.

"This means there cannot be damage on the visible leaves and the plant must be artistically presented," said owner Jim Rietkerk.

The current economic downturn continues to challenge the operation. Input costs and regulatory burdens continue to increase, but the owners believe in their product and say they will continue to produce plants that they believe will enhance and improve the human quality of life.

Time to start gardening

Spring is here, and it's gardening time.

A week ago, Steve mowed the lawn for the first time this spring and I cleaned out the long lily bed out front.

On Sunday, it was tiller time. Steve had already talked to Joe down at the hardware store, and he had the tiller ready to go.

We have two gardens – the main one where we grow cabbage, carrots, corn, squash, beans, peas, lettuce, spinach and anything else that strikes my fancy, and the side garden, which is just a three to four-foot wide area on the south side of the house. That's where we put our tomatoes and green peppers. Last year, I also put in chilies, but then I couldn't figure out what to do with them when I picked the crop.

So while Steve tilled the side garden, I picked the last of my 2012 produce.

Yep, that's what I said. I picked vegetables in April.

Last fall, I dug only about half of my carrots.

cynthia haynes

• open season

The rest I just left in the ground and put a little fence around.

I had done this last year without putting up any barrier, and when it came time to dig the second half of the carrots in the spring, I didn't know where they were. Steve eventually found them with the tiller, which was not the best way to preserve them, but they were all nicely sliced up for salads.

Last fall, I decided that I wasn't going to do that again. So after digging up a pile of carrots, I put a fence around the ones I left.

On Sunday, with storm clouds on the ho-

izon, Steve tilled like crazy and I dug, dug, dug.

As soon as I had my carrots out of the ground, the tiller was going over the ground where they had been.

I also dug up some small lettuce plants that were growing in the big garden. Last fall, I put in some variety lettuce and spinach. Only a couple of spinach plants made an appearance but the lettuce did quite well, especially one huge Swiss chard plant, which was so pretty I never cut it. This spring, the spinach still is absent without leave, but the lettuce was trying to make a reappearance. It was pretty spotty, however, and I figure I need to reseed if I'm going to get a good crop.

So as the raindrops started hitting the ground, I brought my produce into the house and Steve ran the tiller home.

Now all we need is seeds and sun.

Former resident to speak Saturday

MUSEUM, from Page 1

and consulting job, he became a dimensional inspector for Starsys Research Corporation, a small aerospace components company located in Boulder, Colo.. In 2005, Starsys Research was acquired by SpaceDev, Inc., and then in 2008, SpaceDev was acquired by Sierra Nevada. After the SpaceDev acquisition, Sierra Nevada formed the Space Systems Business Area.

The speaking event is being put on in conjunction with the museum's Earth From Space exhibit, which illustrates how satellite imagery is gathered

and used to expand mankind's understanding of life on Earth. It also explores the remote-sensing technology used to gather the images and describes the individual satellites whose images are on display. Earth From Space is on display through July.

Also on Saturday from 1 to 5 p.m., build space ships using recycled materials at the High Plains Museum. The Sierra Nevada's "Dream Chaser" will serve as an inspiration. Bring your own recyclables to build, as well. All ages welcome.

For more information visit online at www.highplainsmuseum.org or call 890-4595.

Board talks bleachers, playground

BOARD, from Page 1

Superintendent Bill Biermann said the track now has lines and is ready for its first track meet.

Biermann reported the parts of the playground at West Elementary that were to be used at Smokey Gardens has been removed and that Alex West will remove the rest. The new playground will be put up on Saturday to Monday, April 27 to 29. Volunteer help will be used to help erect the playground.

During the renovations of Goodland High School, Biermann said, the high school students might be moved to Central Elementary and the overflow to Grant. The students from Central and the sixth grade could immediately move to North. It would be closer to the high school from Central which would cut down on transportation.

The school board decided to allow co-teaching to start in the third grade. It currently is only done in the first and second grade.

Justin Avey for Piper Jaffray Company explained to the board about the different types of

bonds that could be sold and what the timetable would be. The first bond would be for \$500,000 to get the renovation project started for the school. The two type of bonds are competitive which are market driven and negotiated which would allow businesses and individuals from the area to invest and has a quick turn around. Board member Mike Cochran moved to use negotiated sales and Jennifer House seconded. The motion passed.

The board paid \$185,791 in bills. The next regular school board meeting will be at 7 p.m. on Monday, April 22.

K-State expert says put refunds into savings

The Internal Revenue Service reports that it expects 147 million individual 2012 tax returns to be filed. It also estimates about 75 percent of taxpayers who file will be entitled to a refund.

While the popularity of direct deposit has simplified the tax refund process, Elizabeth Kiss, Kansas State University Research and Extension family resource specialist, encourages taxpayers to consider

using the refund to improve their financial situation before rushing to spend it. A tax refund offer will be the largest single sum of money a taxpayer will have access to during the course of the year, and that's why it's important to take time in deciding how to put it to work for you.

While some who have difficulty saving look to an annual refund as forced savings for a specific purpose, Kiss encouraged taxpayers to

review their saving and spending habits and decide whether they want to continue to provide a no-interest loan to the government, or meet with their employer's human resources specialist to adjust withholding to match their tax liability and have more money in their budget throughout the year.

She also advised reviewing personal finances, including earnings, account balances and liabilities, and

then identifying short-term (zero to six months), medium-term (six months to two years) and long-term (more than two years) financial goals.

"Saving is a choice - and an essential foundation for financial security," she said.

Information on building money management skills is available at Kansas State Research and Extension offices throughout the state.

Thunderstorms roll through tri-state area

STORMS, from Page 1

snowing. The snow continued through Tuesday, dropping less than an inch, but wind gusts in the 70 mph range lowered visibility, forcing the Kansas Department of Transportation to close I-70 westbound from Goodland to the Colorado state line.

There were light flurries all day Wednesday, but no accumulation. Winds got as high as 38 mph.

The Weather Service is predicting partly sunny weather today with a high of 53, with a chance of showers in the evening. Saturday should be breezy with a high of 72, before more rain sets in Sunday.

FRANCHISE OPPORTUNITY

SAM & LOUIE'S PIZZERIA

Pride in your product, contributing to the community and financial independence - all with great Pizza, Pasta, and Sandwiches in a warm Italian restaurant - that makes Sam and Louie's the perfect choice when deciding on a Franchise. In smaller communities our menu represents not only great food, but also the upscale Italian restaurant in town. In larger cities our atmosphere, food and service make us stand out from the crowd. A Sam and Louie's Franchise can be tailored to fit your community.

Started in Omaha, NE in 1994, we began to Franchise in 2001 and now have 22 locations across NE, IA, SD & MT and will be expanding into KS & WY very soon. Is your town next? If there is no space available in town or you simply want to have a brand new free standing building, no problem. We have that covered. If this sounds like something you're interested in and you want to find out more, please visit our website or call Michael at (402) 614-8227.

Students share reasons for choosing tech college

Editor's note: The following short articles were written as memos for a writing assignment for Leland Williams, technical writing instructor at Northwest Kansas Technical College. This is a continuing series of short articles split up by program at the college. These memos are from diesel technology, communications technology and general education students.

Northwest Tech has a great Diesel Technology program, and we have learned a lot since the time we started and are looking forward to learning more by the time we graduate.

We chose to go to Northwest Tech because we wanted to make more money! We chose to go to Diesel Technology because we wanted to further our knowledge in the careers we are pursuing. We plan on furthering our education for the next year and pursuing jobs in the field of study we are going to school for.

There are a lot of great people we've met at college who have helped motivate us to do better in our field of study. Mr. Unger is an excellent instructor in the classroom and makes things very understandable. Mr. Garret is a great instructor in the shop by being very detailed in explaining how things function.

We are hoping to use these skills we have learned at Northwest Tech to help us succeed in our careers and pursue the jobs we dream of.

Zane Brown

It was a pretty easy choice for me to choose Northwest Tech in Goodland. I chose Northwest Tech over many other places such as Wyo-Tech. I chose Northwest Tech because it's close to home and I've always wanted to come here since I heard about Northwest Tech.

When I was a junior in high school, I came here on a visit to this college, and once I visited I knew this was the place for me.

So far, Northwest Tech has been a killer good decision in my life. I have learned so much in the few months I've been here. My instructors are some of the best instructors around for diesel tech; they are always willing to help you out when you need help and they are always there and know how to get the job done and done correctly. Northwest Tech diesel department is a great life choice.

After college, I'm planning on going to work for a company or for my current boss for a few years and then maybe open my own shop when I get my feet under me.

I've met some very special people here at Northwest Tech. The cooks always have great food, and they can always put a smile on your face when you're having a bad day or just need a good smile. Two other special persons I've met here are Greg Unger and Oura Garrett, my instructors in Diesel Tech, and last but not least, all my new friends I've met here at Northwest Tech. I don't think you can go wrong with Northwest Tech college.

Cole Mattheyer

I have chosen to further my education at Northwest Tech because my previous jobs were simply that, jobs, not careers. I am attending Northwest Tech to start a career in a forward moving field. The hands on learning Northwest Tech provides is second to none and sets students up with an education good enough to do whatever they please.

I plan to get a career in the communication technology field, though I am not positive exactly what I would like to do. That is one positive of Northwest Tech; it gives more options in such a diverse field. After graduation, I hope to get a position where I can help a company be better and make customers more satisfied. I don't know where this field will take me, but that's the beauty of it; I can go anywhere I set my mind to.

Dakota Sargent and Dakota Roubideaux

We expect our education here at Northwest Tech to benefit us in our future jobs. The education offered at Northwest Tech is high quality; we are offered an education to build a solid base for our futures. The instructors work very hard at improving our skills as technicians.

Along with working on community projects throughout the year, we are also getting our associate's degree, so it will benefit us in moving up positions faster than if we didn't have it.

Dakota Sargent is wrestling for the college on a half ride scholarship; Dakota Roubideaux works for Ag Power Equipment and is also on the Northwest Kansas Emergency Medical Service along with Goodland rural fire dept. We are both very

proud to be here.

Dustin Chewiwi

I decided to come to Northwest Tech to play basketball for the Mavericks because I was accidentally scouted.

Little did I know that when I was playing in a men's basketball tournament in Albuquerque, N.M., the head basketball coach of Northwest Tech was there watching someone else play. He saw me play. After my game, he came to talk to me about playing basketball for him at Northwest Tech.

Now that I'm here at Northwest Tech, we just finished the basketball season. The season didn't go as well as we had hoped it would, but for being a first year team, I feel that we had a very successful season.

Now that basketball has come to an end, my focus is directed on the classes I am currently taking to get my Associate's of Applied Science in Diesel Technology.

Jorge Velazquez

I chose Northwest Kansas Technical College because it gave me a scholarship for soccer play. The soccer coach, Luis Figueroa, was looking when I was playing soccer at my high school, Abraham Lincoln High School in Denver. He thought I was a good player for my team so he thought I would be a good middle left player position for the Mavericks. He brought me here to see the programs, so I am taking general education classes until I enter the electrical technology program.

My education in this college is like an inspiration for me because I never thought that I would be studying at this college. I think that my education is so good because the teacher teach me to do better in my work for English class, and my goal is to keep studying my English to become what I want to be. I wanna be electrical engineering and that it's that reason that I want to succeed on my English.

College has been more difficult because I have more challenges. I don't know the language is many people does. Also I struggle to much because I don't have my friends who were there for me to help me with my English and classes.

Bryce Gray

One reason I came out to Northwest Tech is because I wanted to further my education, and with Northwest Tech I could finish out my senior year of high school. Being a senior option student, Brewster High School has paid for most of my college.

The other reason I came out here is because my mom teaches at the college so I didn't have to pay tuition. While I have been out here, I have worked at Taco Johns and am the manager over there.

Since I have been out here I have made several friends, and have met some great people. Back home in Pueblo, Colo., where I'm from, my family is really big on cars and even owns a junkyard.

Isaac Benavidez

The reason I chose Northwest Tech college was to further my education and also to wrestle. It all started my senior season when I was in high school at the state championships for wrestling and a coach approached me after one of my matches.

The coach said he liked the way I wrestled and wanted me to take a look at his school. He said he was new to the school, and he wanted to recruit some kids to start the program. Also, he told me the college had programs such as diesel, auto tech, electrical, and general education.

I took a look at the school, gave

the coach a call and told him that I was going to apply; he said that he had some scholarship money for me if I chose Northwest Tech. A couple weeks later, I called him up and said I wanted to go to Northwest Tech. He gave me a letter of intent to sign. That's how I got here to Northwest Tech.

Jacob Garcia

I write to you today to inform you of my purposes for attending the communications program here at Northwest Kansas Technical College. I have heard that the program here is great for teaching students information about how exactly computer functions work. This field has interested me for quite some time, and I always knew I wanted to go into this program here at the college.

I have met some really nice people here as far as teachers, staff and classmates as well. Northwest Tech has welcomed me here with open arms and I had no issue enrolling into my general education courses. All my teachers have been excellent so far in teaching, and every day I come here knowing I made a good choice attending this school.

My reasons for coming here, as I have stated in the beginning, are to learn about computers and the way people can communicate faster and easier. However, there is another reason for beginning my career here at the college; I will be able to have an associate degree that allows me to transfer. After receiving my associate's, I would like to transfer to Garden City Community College to enroll into the John Deere Tech program. My main goal is to work with the company and be able to work on the new technology that this company uses on their equipment.

Tyler Janzen

I decided to come to Northwest Tech for several reasons.

First, I chose the college because it is close to home so I can continue to work at my job. Another reason I came here was that I had heard a lot of good things about this college. The third reason I came here was because my employer decided that if I came to Northwest Tech, he would pay my tuition for my education, a deal that I could not refuse.

I enjoy going to school here mainly because of the experience that the instructors in the diesel department give you in the shop and in the classroom. The instructors in the diesel department are very smart, very experienced, and very easy to get along with.

When I am done with my education at Northwest Tech, I will repay my employer for his help with my schooling by using the knowledge I have gained at Northwest Tech to help him in his business.

Laramie Jenkins

I chose to further my education at Northwest Tech because I have always been interested in the Diesel field. I also chose this college because it is close to home and it would save me a lot more money to go to school here rather than move to a different location. I have learned many different things from hydraulics to electricity.

I expect to graduate here and go to work directly after that. I plan on working for a business that I think I would enjoy working for. The instructors are always having someone from a business coming in and talking to the whole department about what they have to offer and how they do things.

I know my education will make me a better employee because the instructors enforce being on time and showing up every day. They always have work for us to do so

we are always busy.

Kelby Sanchez

I have chosen to further my education at Northwest Tech because I felt my previous employment was not going anywhere. I knew that going back to school would give me a career that would help provide for my family and give me employment that I would enjoy doing everyday.

I knew Northwest Tech would give me the training needed to obtain an entry-level position in the communications field. Since I work locally, by going to college locally, I wouldn't have to drive far to get home and go to work, and I wouldn't be too far in case of family emergencies.

After graduation, I plan on starting my new career in the communications field. I am still undecided about where I will go, whether a job keeps me in Goodland or takes me to a new place.

Because of my education at Northwest Tech, I will be a better employee. The program has already taught me to be on time for everything I do. Coming to class with a good attitude has already paid off with hard work and better grades.

Marrietta Young

Coming straight to college after high school was a big step for me. Coming to Northwest Tech was also a drastic change and decision for me. I chose to further my education due to the fact that I would like to have a career and be in the workforce by the time I'm twenty-one.

I chose to attend Northwest Tech because they have an awesome Respiratory Program and a dance team that I could be a part of. When I graduate in 2015, I will be graduating with an Associate's of Applied Science in Respiratory Therapy. When I finish my schooling here at Northwest Tech, I plan to move back home to Colorado Springs and find a well paying job.

I look forward to meeting many special people next year when I join my program. My education at Northwest Tech will prepare me to be a great employee by increasing my professional skills and teaching me new things about the workforce I should know as well as about my particular field in respiratory care.

Matthew Augustine

After leaving the U.S. Army, I had to decide what career path I needed to take. With many choices in front of me, I had to decide what was the right choice for me. After research on the Internet for many different fields, I decided on Automotive Technology and Collision Repair.

After deciding on the field I wanted to pursue, finding a school was my next goal. I wanted to stay in the northwest Kansas area, but if I had to

move for a good education, I would have. Fortunately for me, I found Northwest Tech which offered the programs I wanted and needed to pursue my career choice.

I contacted the school to get more information on the programs, at which point they offered a tour of both programs. During the tour, I met the teachers and saw the facilities of the programs and was very impressed.

Currently I am attending my general education education classes, waiting to start the Automotive Technology and Collision Repair courses in the fall. Now that I am a part of the campus, I know I made the right decision to attend Northwest Tech.

Nathaniel Smith

I am a student at Northwest Technical College. I am a first year student in the diesel tech program. I am also a senior in Goodland High School doing the senior option. I want to further my education in diesel tech because the diesel industry is an always-growing industry, and there is always a job opening somewhere. I like the diesel program here because Goodland is my hometown and the program is hands on learning, which is the best kind of learning for me. Northwest Kansas Technical College has the biggest and the best diesel tech program in the state or tri-state area.

As soon as I graduate from Northwest Tech, I plan on going straight to work. I'm not 100 percent sure where I am going to work yet, but I want to find a job with a good working environment and good people to work for. I have thought about opening my own shop with truck, agriculture, and auto repair, as well as 24-hour towing and service assistance. That one might have to wait awhile.

The education I get from Northwest Tech will make me a better employee because the instructors teach us good work ethic and a good shop environment where we can work hard and get a lot done. The instructors encourage us not to just go for the money but go for the companies that we can see treating us right, paying us right and respecting us for the work we do.

Nicholas Newman

I chose Northwest Kansas Technical College because of my agricultural background. Growing up farming has taught me that things will always need to be fixed. To further my education, I enjoy being enrolled in the Diesel Technology program. Hands on learning opportunities are very striking to me. I am working toward an associate's degree in Diesel Technology. I plan to receive other certifications such as MACS and ASE testing.

The instructors in this program are very knowledgeable with many years experience in the diesel field. There is not a question in the world they are not willing to answer.

Overall, I think Northwest Tech was a great decision for me, and I feel that I am getting a good training for my career.

Jason Sis

I came to Northwest Tech to further my education in diesel tech.

I have learned a lot since I have been here at Northwest Tech. My instructors work hard to teach us the knowledge we need to have to graduate in May of 2014. We will get our associate's degree, ASE certifications, and MAC A/C certification.

I encourage you to come to Northwest Tech to further your education in your life.

Mitch Spiegel and Britton Sealock

We have chosen to come to Northwest Tech and further our education

because the Diesel Technology program allows our skills to improve in every aspect. By improving our education in this collage, we are allowing ourselves to get great money making jobs.

Another reason Northwest Tech was chosen was because there are not many colleges that allow college wrestling and a diesel program, and Mitch is a wrestler for Northwest Tech.

This program teaches you to work hard, be on time, and make every second count so you may make the most money possible once you find the best job after graduation. The program is a great program for any young man with the ambition to learn, to work, and to make money. The big plan in going to any college is to take up what you enjoy and hopefully one day make a career out of it. That's the big dream anyway.

Tran Vincent

I have chosen to further my education at Northwest Tech because I've grown up on a ranch operating equipment since I was 8 years old. I enjoy running equipment and working on it when it breaks down. I also enjoy helping people out when they need help, so I decided since I love working with equipment and helping people, I would be a diesel technician doing the two things I love and enjoy.

I decided to be a diesel technician because I've always had a small idea on how the equipment worked but I wanted to know how all the components in the equipment worked together to make the equipment work and run smoothly. I have also furthered my education so I can build a career and make a good living that will support my family.

I chose Northwest Tech because they run their shop like a real live shop that works on real customers' equipment. We have a parts room that works like a real parts room would in a shop. We all have at least one week in the parts room so we have a better idea on how the parts room works. We are also assigned to do a new cleaning job every week in the shop so we keep the shop very clean and organized. Once a year we are given the job of being shop foreman so we have a better idea of what it is like to be in charge of all the first year students, making sure they get their jobs done.

By furthering my education, I will learn how to properly diagnose and fix a problem on a piece of equipment. With my education, I will obtain a career being a diesel technician and support my family by doing what I enjoy doing, which is working on equipment and helping people.

Wyatt Russell

I am currently a student at Northwest Tech in the Diesel program, and I chose to go to school here because of the location, cost, and amount of hands-on work and real life experience. Having looked around at a number of other colleges, all of the reasons previously described made me decide that Northwest Tech was for me. All of the things that we have learned, both in the shop and in the classroom, have really taught me a lot.

After graduating from Northwest Tech, I would like to go to work for John Deere, and I believe that my education will get me there. I plan to move to Hays with my girlfriend and go to work at Carrico Implement. I hope to start out as entry-level technician and work my way up. I have a great work ethic and experience to make me a better employee and maybe a boss someday.

In conclusion, being a student here at Northwest Tech has taught me so much, and I have had a great time going to school here.

a word to the wise

you can learn a lot from the Newspaper!

Encourage your children to make reading the newspaper a part of their everyday routine for lifelong learning. Newspapers are living textbooks, helping students develop reading, math, social studies and language skills while exploring the issues affecting our world today.

Peabody farmer produces music videos

By Ron Wilson

*Director
Huck Boyd National Institute
for Rural Development
at Kansas State University*

What is your creative outlet? Playing piano? Singing in the shower? Doodling on a napkin? Today we'll meet a young Kansas farmer who found a creative outlet in creating music videos to post on the Internet. In doing so, he is helping communicate about agriculture and rural life.

Derek Klingenberg is founder of Klingenberg Farms Studios near Peabody. He grew up on a farm near Peabody and attended Kansas State where he majored in agriculture. He is musically talented, having sung in the Kansas State Men's Glee Club and played trombone in the marching band.

After college, Derek married and returned to the farm. He and his brother Grant and some friends started a bluegrass singing group called the Possum Boys. It was a lot of fun, but the group disbanded when two members of the group went to seminary.

"I needed a creative outlet," Derek said. He wrote a song about bumble bees and, for fun, decided to try making a video to go with it. He bought some software and a camera. His brother Grant helped him make the video, called Bumble Bees in the Hay, which they staged on a hayfield on their farm. "I spent maybe a year filming and editing those first videos," Derek said. The next step was to post the video online.

These farmboys did not begin as technology whizkids. In fact, it was a time when social media were just

emerging.

"We didn't really know what YouTube was at the time," Derek said. "I didn't even have Internet. I had to go to my brother's to post it online."

But he did post it online and he got a good reaction. Derek wrote more music and tried another video called Possum in the Barn. He got Internet access and upgraded to a nicer camera and professional software, producing more videos using his self-taught skills.

For example, he learned about green screens which can project a video image behind a performer. He recorded the music at a studio in Newton.

Derek continues to produce music videos focusing on those things closest to him: Family and farm. It is a homegrown operation.

"My computers are in the basement of my house," Derek said. The studio for filming is in a newly constructed Morton building which also serves as an office and machine shed for the farm.

During the 2012 Christmas season, he produced commercials for businesses in Newton. Mid-Kansas Co-op had him do a music video called White Pickup Truck, which was a parody of Toby Keith's song Red Solo Cup.

In March 2013, Derek posted a music video called Ranching Awesome, which was a parody of the song by Thrift Shop.

For example, instead of the line "I've got twenty dollars in my pocket," it said, "I've got twenty thousand pounds of cow feed."

Presented with lots of tongue-in-cheek fun, the video featured scenes

of everyday life around the farm and information about beef and pasture burning. It also showed Derek's two cute young daughters, ages five and three.

The video even included a cameo appearance from Derek's rancher father.

"We asked him to do it in front of my mom so he couldn't turn us down," Derek said with a smile. "My parents have really supported me on this stuff."

The Ranching Awesome video soon went viral among the Kansas agricultural community, circulating on social media and, in three weeks, reaching more than 189,000 views on YouTube.

Not bad for a video produced in a rural setting. The Klingenberg Farm and Studio is located between Peabody and Elbing, a rural community

of 214 people. Now, that's rural.

For more information, go to www.facebook.com/klingenbergstudios or follow Derek at www.twitter.com/KlingenbergFarm.

What is your creative outlet? We commend Derek Klingenberg and family for finding a creative outlet with online music videos about agriculture.

While providing good, clean entertainment, they are also making a difference by creating more knowledge about farm and ranch life.

And there's more. Another parody music video about agriculture landed its producers in a New York television studio. We'll learn about that next week.

Century farms to be honored

Tradition and heritage is a big part of what makes agriculture such an attractive way of life for so many Kansans. The lifeblood of our existence, the farms and ranches in Kansas, provide food, fuel and fiber for the world.

The history of these farms and ranches is rich, with many stories to tell. In that spirit, Kansas Farm

Bureau is launching the 13th year of its program to honor those family farms that have passed down this heritage for more than a century.

The Kansas Farm Bureau "Century Farm" program will recognize family farms whose current owner-operator of the farm is related to the owner-operator of the farm in 1913 or before. Qualifying farmers

will receive a farm sign designating "Century Farm" status and recognition from Kansas Farm Bureau.

"As farmers and ranchers, we are proud of our legacy and heritage," said Steve Baccus, Kansas Farm Bureau president. "The Century Farm program will help others better appreciate the strong family ties and tradition that we hold so dear."

During the first 12 years of the program, more than 2,100 family farms qualified for the designation.

The deadline for consideration is Wednesday, May 15.

Applications and former designees may be found at kfb.org/getinvolved/centuryfarms.

PARENTS AND GRANDPARENTS OF 2013 GRADUATES

Goodland High School; Brewster High School; Goodland Learning Center

As we plan our annual Graduation section, we would like to include parents or grandparents in the process by offering you a special ad in this section.

Put it in their scrapbook, send it off to family, but let that graduate know how proud you are of them! Place a baby picture or favorite childhood picture or a current picture if you like. Include a short note to your graduate. They are only a High School graduate once!

If you have a 2013 Graduate in the family and would like to honor them, call Kayla or Angela today for more information. Our office number is (785) 899-2338.

Spaces available:

1/16th display ad (2.5317 in. wide x 2.812 in. tall)=\$25.00 (TEXT ONLY)

1/8th display ad (5.188 in. wide x 2.812 in. tall)=\$50.00 (PICTURES & TEXT)

•• ADS ARE DUE BY APRIL 26, 2013 AT 12 P.M. MT ••

Italian vegetable has become popular

By Kay Melia

The Gardener
vkmelia@yahoo.com

Looks like it's full speed ahead in the garden this week, barring occasional showers and family activities that may preclude going out there and getting our hands dirty. It's a wonderfully busy time of the year!

Alright, go ahead. Guess what garden crop has emerged from obscurity to popularity in just the last two or three decades. In the mid-60's and even the 70's, it was to be found only in Italian gardens

kay melia

• the gardener

and most Americans didn't even know how to spell it. Like pizza, which also came from Italy about the same time, many people have learned to thoroughly enjoy it in this country.

But unlike pizza, this garden vegetable is a veritable powerhouse of nutritional value. A party tray of

fresh raw vegetables just isn't the same without it, and many school lunch programs now offer it on their menu.

It's broccoli of course, and you would hardly believe the amount of food value contained in those dark green florets, which are actually flower buds. Nutritionists say broccoli is loaded with calcium, niacin, thiamine, potassium, iron, vitamins A and C, tons of fibre and lots of other good stuff. With that kind of

a pedigree, we all should run right down to the store and buy a head or two. At the very least, we should all find some space in our garden for a few plants.

But most of us will do neither! The reason is simple. We just don't like it! Our taste buds refuse to cooperate within our brain cells that tell us it is one of our most healthful foods, and then we'll have another slice of pizza.

Over the years, I've learned to enjoy it, kinda, particularly in a good, thick soup...heavy on the cheese, please. I nearly always set out 150r

20 transplants, just about this time of the season, and we freeze many bags for winter use. It is relatively easy to grow, and can withstand a late spring frost but dislikes the heat of early summer. I place a bottomless three pound coffee can around the plants to protect them from the wind. Always buy your transplants from a reputable garden center where you'll usually find the best varieties like Packman or Green Comet.

Harvest time for broccoli comes when the florets of the head are tightly packed and are a dark gray-

green color. But if you wait too long, those florets become beautiful little yellow flowers, and you've lost the crop. When you bring the heads to the kitchen from the garden, drop them in a pan of salt water, or vinegar water. If there are little green cabbage worms inside the head, they will be dislodged by the water solution.

If they refuse to loosen their hold, they certainly will do so when you cook the broccoli for dinner. Watch for them then, unless you prefer to add even more calcium to the meal.

Money available for energy projects

The U.S. Department of Agriculture Rural Development State Director Patty Clark says the program is seeking applications for energy efficiency and renewable energy projects.

Money is available from the department's Rural Energy for America Program. Despite budget uncertainty, the department is working to strengthen the rural economy, she said.

Authorized by the 2008 Farm Bill, the program is designed to help farmers and rural small businesses reduce energy costs and consumption and help meet critical energy needs.

The following applications are being accepted.

• Renewable energy system and energy efficiency improvement grant applications and combination grant and guaranteed loan applica-

tions until April 30.

• Renewable energy system and energy efficiency improvement guaranteed loan only applications until July 15.

• Renewable energy system feasibility study grant applications through April 30.

The program has funded nationwide over 6,800 renewable energy and energy efficiency projects, feasibility studies, energy audits and renewable energy development assistance projects.

For information contact Rural Development Business program specialist Doug Bruggeman in the Hays Area Office (785) 628-3081.

public notice

IN THE DISTRICT COURT OF SHERMAN COUNTY, KANSAS

IN THE MATTER OF THE ESTATE OF LESTER J. FRAZIER, DECEASED

CASE NO. 2013 PR 01

NOTICE OF HEARING AND NOTICE TO CREDITORS
Pursuant to the Kansas Simplified Estates Act

THE STATE OF KANSAS TO ALL PERSONS CONCERNED:

On April 3, 2013, a Petition was filed in this court by Leslie J. Bartels, praying for admission of the last will and testament of Lester J. Frazier, deceased, to probate and record, and that letters testamentary be issued to her under the Kansas Simplified Estates Act.

You are required to file your written defenses thereto on or before the 29th day of April, 2013 at 11:00 o'clock A.M. of said day, in this Court, in the city of Goodland, Sherman County, Kansas, at which time and place the cause will be heard. Should you fail, judgment and decree will be entered in due course upon the petition.

All creditors are notified to

exhibit their demands against the estate within four (4) months from the date of first publication of this notice, as provided by law, and if their demands are not thus exhibited, they shall be forever barred.

IN THE DISTRICT COURT OF SHERMAN COUNTY, KANSAS

IN THE MATTER OF THE ESTATE OF JOHN DOUGLAS PFAFF, a/k/a DOUG PFAFF, Deceased,

Case No. 13 PR 07

NOTICE OF HEARING

THE STATE OF KANSAS TO ALL PERSONS CONCERNED:

You are hereby notified that a petition has been filed in this court by Diane Hannum, praying for the determination of the descent of the following described real estate;

an undivided one-fourth (1/4th) interest in and to lots Twenty (20) and Twenty-one (21) and a tract beginning 15' South of the NW corner of lot Twenty-two (22), East 70', thence in a Southeasterly direction to a point 84.4 feet east and twenty-two (22) feet south of the Northwest corner and thence East 55.6 feet; thence South three feet (3) along the East boundary line of Lot numbered 22;

thence west one hundred forty feet (140'); thence North ten feet (N10') to the point of beginning, Block Five (5), CK&N Addition to the City of Goodland, KS, according to the recorded plat thereof, being otherwise described as the premises at 1523 Clark Street, Goodland, Sherman County, Kansas, and the improvements thereon;

and all other property, real and personal, or interests therein, owned by the decedent at the time of death; and you are required to file your written defenses thereto on or before the 22nd day of April, 2013 at 3:00 o'clock P. M. of said day, in this Court, in the City of Goodland, Sherman County, Kansas, at which time and place the cause will be heard. Should you fail therein, judgment and decree will be entered in due course upon the petition.

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

Track team gets two firsts at Norton

The Goodland High School track team traveled to Norton on April 4, ending up with two first place finishes.

Boys

Adam Simmerman won first place in the 800-meter run with a time of 2 minutes, 10.47 seconds. Simmerman also tied for seventh in the high jump with 5 feet, 4 inches.

Goodland's 4-by-800 relay team of Simmerman, Josh Whisnant, Xavier Foust and Gerell Miller also placed first with a time of 9:12.39.

Other individual results included:

Ace Arteaga - second in the 1600-meter run with 5:05.75; and second in the 3200-meter run with 11:21.21.

Zach Miller - second in the 110-meter hurdles with 17.69; and 16th in the shot put with 35 feet, 2 inches.

Dax Ruhs - second in the javelin with 163 feet, 3 inches; and fifth in the 100-meter dash with 11.79.

Aaron Arteaga - third in the 1600-meter run with 5:10.15; and fifth in the 800-meter run with 2:21.51.

Tristan Cooper - fourth in the 1600-meter run with 5:13.21.

Aaron Avelar - fourth in the 110-meter hurdles with 17.72; and fifth in the 300-meter hurdles with

45.37.

Todd Sneathen - fourth in the 200-meter dash with 23.65; and sixth in the 100-meter dash with 11.84.

Kolt Trachsel - fourth in the 800-meter run with 2:21.31; and 14th in the 100-meter dash with 12.59.

Koal Artzer - sixth in the high jump with 5 feet, 6 inches; and 11th in the long jump with 16 feet, 9.25 inches.

Whisnant - sixth in the 400-meter dash with 56.49; and 10th in the shot put with 35 feet, 10.5 inches.

Foust - seventh in the 200-meter dash with 24.24.

Gage Owens - ninth in the long jump with 17 feet, .75 inches; and ninth in the triple jump with 36 feet, 3.5 inches.

Nael Radwan - 10th in the triple jump with 35 feet, 11 inches.

Levi Klemm - tied for 10th in the high jump with 5 feet, 2 inches; and 16th in the 200-meter dash with 26.44.

Drew Dautel - 11th in the 400-meter dash with 59.71; and 13th in the long jump with 16 feet, 6 inches.

Gerell Miller - 14th in the 400-meter dash with 1:02.18; and 17th in the discus with 96 feet, 2 inches.

Jeff House - eighth in the javelin with 122 feet, 10 inches; and 14th in the discus with 97 feet, 11.5

inches.

Josh David - 15th in the triple jump with 30 feet, 7.5 inches.

Alec Hamilton - 25th in the discus with 63 feet, 3.5 inches.

Tanner Schmidt - 26th in the shot put with 26 feet, 8 inches.

The 4-by-100 relay team of Ruhs, Sneathen, Foust and Zach Miller placed third with 45.67.

Cowboys fall 9-8 and 4-1 to Hugoton

The Goodland Cowboys lost both games of a doubleheader against Hugoton, 9-8 and 4-1, on April 4. They are scheduled to play Ulysses at Memorial Field today and at Wray on Thursday.

In the first game the Cowboys batted first and scored one run in the first inning, answered by two from Hugoton. Neither team scored in the second, but both teams put in three runs in the third, making it 5-4 in favor of the Eagles. Neither scored in the fourth or fifth innings. Hugoton scored two in the sixth and seventh innings to make it 9-4. The Cowboys ended with four runs in the seventh, but it wasn't enough to overcome the Eagles' lead.

The starting pitcher for the Cowboys was Gunner Helton, who also scored three runs, Kelby Smith scored one run; Taylen

Smith, two; and John Hendrich, two. Kelby Smith had three RBIs and hit a double. Taylen Smith had an RBI, Hendrich, one; John Peden, one; and Kyler Amthor, one.

Luke Avila stole one base; Helton, two; Kelby Smith, one; Hendrich, one; and Peden, one.

In the second game the Cowboys lost 4-1. Both teams remained scoreless in the first inning. Hugoton score a run in the second inning. Goodland scored its only run in the third. Neither scored in the fourth and fifth innings. Hugoton pulled ahead with three runs in the sixth inning to take the win.

The pitcher was Taylen Smith. The only run was scored by Avila, who was driven in by Kelby Smith.
