Singer/Songwriter Willie Mack hails from Chino, TX, a small town of 850 people. He grew up on a ranch building fences and branding cattle. Willie uses real life experiences as inspiration for his song writing.

Willie's new album, "Average Guy", will hit stores the end of August. This album features songs that are all written or co-written by Mack.

Willie describes his music as a blend of influences, such as: Steve Earle, Dwight Yoakam, Merle Haggard, Bruce Springsteen, Elvis Presley and the Beatles. The songs portray the real life of a real man facing the struggles of dreams, family and reality.
