little shocked when they showed up at Oberlin Elementary School only to find eight state troopers standing outside, checking to see if the drivers and kids were properly secured.

The troopers visited on Thursday, Feb. 13, for Child Safety Awareness Week. Trooper Jerry Stritt of Oberlin said they also went to schools in Stockton, Phillipsburg and Smith Center that week.

He said the troopers stopped each car to make sure everyone in the vehicle had their seatbelts on and children were properly restrained.

The officers talked with people in 77 cars that day.

Of those, 12 adults received tickon and 16 for a child under 14 not wearing a seatbelt.

The officers did give some warn-

ings, because in order to give a ticket Some parents may have been a forkids not being belted in, there has to be another violation.

Kansas law requires everyone in a vehicle wear a seatbelt, said Trooper Stritt, but there are some specific rules for kids.

Kids under 4 years old have to be in a child safety seat, he said. (In Nebraska, that applies to any child under 5.)

There used to be a weight exception in the law.

Kids over 100 pounds, even if under that age, didn't have to sit in a safety seat. That was taken out of the

Any child under 14 or under has to be belted in.

Tickets for not wearing a seatbelt ets for an adult not having a seatbelt are \$10 for adults and \$20 for kids, said Trooper Stritt.

Oberlin's test well pumps less water than city expected

A test well drilled about 40 feet from the irrigation well the city bought last year hasn't shown the best numbers in preliminary tests.

Thaniel Monaco, an engineer with Miller and Associates, said the figures he has received are preliminary because all of the tests haven't been done. So far, he said, it looks like a well there would only pump 140 gallons a minute.

From the information the city received on the irrigation well, the hope was to get 400 to 500 gallons per minute. Mr. Monaco said that could still happen. They may be testing in the wrong spot, he said, and the numbers are only preliminary.

He said the drilling company, Layne Western, found a static water level about 24 feet below ground surface. The depth of the test well was about 70 feet with 30 feet or gravel at the bottom.

The 12-hour pumping test showed the test well could only pump for that long at 140 gallons per minute without drawing down the water level. Mr. Monaco asked for permission to test the irrigation well for 12 hours. The test well and irrigation well are only 40 feet away, he said, yet there is a big discrepancy in the numbers.

There will be some more expense to test the irrigation well, he added. The council approved the extra test.

Mr. Monaco said if the well is going produce 200 to 300-gallons per minute, the council might want

Store shuts doors without notice, shocking shoppers

Bv KIMBERLY BRANDT Hill City to shop.

Customers coming to shop at Oberlin's Duckwalls store last Tuesday were greeted by locked doors and brown paper covering the windows.

The downtown store was closed Tuesday morning with no warning, as a team of managers from the firm's Abilene headquarters showed up at first light to start packing and moving the merchandise.

Decatur County Chamber of Commerce Manager Glenva Nichols, whose office is across the street from the store, said she got in a little after 9 a.m. and everything looked normal. Then she saw women in the window taking out the decorations and putting up the brown paper.

A sign on the front window says that Duckwalls has closed the store here and it invites customers to drive to Atwood or

Mrs. Nichols said when the paper started to go up, she didn't know what was happening. When she found out, she said, her reaction was, that is just the way big companies do things. It is, in fact, the way Duckwalls usually does things.

A press release hand delivered to The Oberlin Herald that morning, says the sales floor of the store would close Tuesday and gave customers a little under a week to pick up their film and layaway items.

"As a normal course of business, we financially evaluate all of our locations on an annual basis or when the lease options allow us to exit a location," said District Manager Scott Orcutt. "Our study indicated that we would be able to make better use of our assets in another loca-

Students remember Columbia shuttle

By KIMBERLY BRANDT

Red, white and blue posters lined the lockers on the main floor of Oberlin Elementary School, each with pictures of American flags, astronauts, space shuttles or other patriotic graphics in memory of the fallen Columbia.

After the shuttle exploded 39 miles above the earth in the last 16 minutes of its trip on Saturday, Feb. 1, fifth graders had a lot questions, said teacher Casandra Holdeman. That's one of the reasons the students did the memorial project.

Each student made a poster with pictures and words of what they were feeling at the time.

Ms. Holdeman said she has had an interest in the space program for

He said the company normally makes a decision like this and then comes in and closes the store. That is why there was no warning, he said. It was the same when the company closed its Alco store in Goodland last year and an Alco store in Garden City a little more than a week ago.

When the store in Garden City closed, the firm said it was getting out of towns larger that 5,500, especially those with competing discount stores like Wal-Mart.

Mr. Bowman stood inside the store with the door open part way. He said that the merchandise inside would go back to the warehouse.

Employees will have the choice of being transferred or taking a severance package, he said.

Mr. Bowman said this was the only store in the Alco and Duckwall chain that was being closed on Tuesday. He said he can't disclose any other stores that are on the list to

Asked if it might be a nearby Alco, he said, "You ask good ques-

In less than two weeks, he said, the merchandise will be out of the store. Mr. Bowman said he couldn't say if the company owned or leased the building and would not let the reporter in to take pictures "for safety reasons.'

The building is owned by Joe and Patty Currey of Hays. Mr. Currey said he received a phone call last week from someone in Oberlin that the store had closed. He said he tried to contact the company but his phone call was not returned.

The next day, said Mr. Currey, he received a registered letter about the

Laurie Wasson, owner of Prairie Petals and president of the Oberlin Business Alliance, said she was sad that the store had closed. Duckwalls has closed before, she said, and then reopened. The store wasn't closed for very long then, she said, but who knows what will happen this time.

In 1986 the first Duckwalls store closed at the firm's original location, just north of Stanley Hardware, when it was sold to the Banner store chain. In 1992 after the Banner store closed, Duckwalls reopened in the present location.

Mrs. Wasson said she is disappointed in the firm for the way the closing was handled. The store was a real asset to the community, she said, but this is just a sign of the

The downtown store is highly visible, she said. Big businesses go down every day around Oberlin, she said, mostly family farms, but people don't see that.

This time, people can see the brown paper in the storefront.

Mrs. Wasson said even though it is hard, people need to have a positive attitude about the closing. Something good always comes out of everything, she said; sometimes it just takes a while.

Down the street at Times Past, Arian Arnold said when she drove down the alley that morning she saw the palettes of boxes behind Duckwalls but didn't realize what it was until she heard the store had closed. She said she couldn't believe the company had closed the

Mrs. Arnold said she had heard rumors about the store closing. She said she learned what happened while talking on the phone to someone who had just found out.

She said a lot of people shop out of town for products that could have been purchased at that store.

"All I can say is, shame on us," said Mrs. Arnold.

Fees may be needed to pay for program

The Local Environmental Protection Group, which tests water wells for nitrates, arsenic and other chemicals and works with bringing septic systems up to code, asked Decatur County commissioners last Tuesday to hike fees for area users to help pay for the program.

Mike Balthazar, representing the group, said he has set up meetings with the 16 counties in the northwest Kansas area to get some feedback before any decisions are made. He said for the last 13 years, the program has been operated mostly with state money, but with the budget shortfall, some money may need to come from local sources.

He said the state would like to see matching funds from counties.

Balthazar, either fees for the services or a small county tax which would go to the program. Commissioner Ralph Unger

asked how much the counties would have to raise. Mr. Balthazar said the program needs \$130,000 for base funds. That's \$7,000 from each of the 16 counties and then \$23,000 raised in fees.

There is a carryover each year of

Mr. Unger said to get the money the program needs, though, the fees would have to be quadrupled. There is also a possibility of raising county permit prices.

The biggest activity, said Mr. Balthazar, is in Thomas, Norton, Scott and Sherman counties.

Mr. Unger said he thought some of the money needed to be generated by an increase in fees. He suggested a charge of \$30 for septic system inspections and permits. If there are 300 a year, then that would bring in That doesn't mean that they can't

still test water wells for Head Start families or families on Women, Infants, Children for free. He said he didn't want to put a hardship on There are two ideas, said Mr. people so they don't get the tests done, but some of the prices could

Counties can pull out of the program before April 1, said Mr. Balthazar.

Commissioner Doyle Brown agreed that they should be able to come up with some of the money through fees, but shouldn't charge poor people a high rate. Mr. Blathazar said the program
