"You have a compression fracture in the lower back."

BoB Templeton, Retired Broadcaster and Chamber Executive

Ten days into his Florida vacation, BoB Templeton woke up one morning and couldn't move. He was in so much pain, he couldn't roll over. He couldn't sit. He almost crawled to the door jam to pull himself up. It was several painful, excruciating days before he could get in to see a doctor.

"You have a compression fracture in the lower back", he was told.

Templeton called his personal physician in Hays, who recommended Kyphoplasty, a new type of minimally invasive back surgery now offered through The Spine Center at Hays Medical Center.

The procedure involves elevating the vertebrae with a balloon and injecting a cementing compound to hold them in place.

The surgery was performed upon his return to Hays. "I was happy to be able to come home and get it done here," he said.

Templeton described his level of pain at a "10" before surgery. "Kyphoplasty was instant relief for me. When I woke up from surgery, it was gone. That's pretty phenomenal!" he said.
