What does your bale feeding area look like?

This side-by-side field test shows the comparison between the new Convert-A-Bull feeder insert and the conventional feeder. Nine cows per feeder for three days. You be the judge! It's your hay, and your money to save! Field test show up to a 25% feed savings.

The Convert-A-Bull fits universally over 8' diameter bale feeders and funnels hay to the center for maximum feed savings. It also prevents spoilage by keeping the hay off the ground, and in turn cattle consume the entire bale without waste or build up.
