Snow-wet, wonderful and welcome-and Western Kansas' much despised wind combined to give the area its worst storm in nine years and the best early spring moisture since 1953. There was general agreement that this storm was the worst since 1948. Rural users of REA lost their power supply but the only slightly below freezing temperatures minimized the difficulty of stranded motorists on the highways. The Highway Patrol estimated some 1,600 people in Kansas were marooned.

One of the major trouble spots was west of Oberlin near the Decatur-Rawlins county line, where 57 people were stranded 38 hours before being rescued by a cept Saturday with the final Sunday and a bus which had been chartered awning on the north side of the Sec- mage sale. Both were taken to the Hoxie hospital by ambulance but Mr. Hamilton was pronounced dead. Sloan was dismissed from the hospital on Tuesday.

It was just too much for our old flat roofs on the two main buildings. First the rain turning into ice and then the 30-plus inches of snow caused leaking, and loss of insulation and tiles. The problem was caught in time to get items moved to safety, other items trapped, and buckets set around.

The snow and ice also caused the

# *"When it comes to your heart, you want the best!"*

Traveling nearly 200 miles from his hometown of Wichita to Hays for heart surgery was a simple decision, once Paul Bender learned that former Wichita cardiac surgeon Dr. Gary Benton was now at the DeBakey Heart Institute.

"My wife had a heart attack two years ago and Dr. Benton treated her with a triple bypass," Bender explained. "We were very impressed with Dr. Benton's professionalism and follow-up, and care and treatment that he gave my wife after her surgery."

When it came time for Bender's own surgery after being diagnosed with heart blockage, his wife urged him to seek out Dr. Benton.

"We did. We tracked him down!" Bender laughed. "We came to Hays because we knew Dr. Benton was here and we'd get the best treatment possible."

Seeing the DeBakey Heart Institute for the first time, Bender was quite impressed to find such a large facility in a community the size of Hays. "It was a lot more than I expected it to be."

"My wife, being a nurse, is familiar with the care and treatment that people receive in the hospital and she was quite pleased with the treatment I received here at DeBakey Heart Institute," he said. "I feel that the treatment I received here and from the staff and the medical personnel was far superior to the treatment my wife received at a local hospital in

Wichita...and that's one of the reasons why we came here."

Bender wishes he would have done more to help prevent the heart problems that required triple bypass surgery. He admits he needs to be healthier and lose weight and is working on both.

His advice to others: have a lot of faith in your doctor. "Ask around, because not everyone's an A+ doctor and when it comes to your heart, you want the best."

"My future looks good and it's very bright, thanks to the surgery," he said.
